## Summary

### Day 1

**Wednesday 12th October**

Overnight flight from the UK to Bogota

### Day 2

**Thursday 13th October**

We arrived in Cali at dawn after an overnight flight from the UK via Bogota. Walking out into the airport carpark with Johnnier, our local guide, we were greeted by our first Colombian birds: colourful Saffron Finches, noisy Blue-headed Parrots, a Greater Kiskadee or two and some elegant Fork-tailed Flycatchers. We boarded our comfortable minibus and drove through the agricultural flatlands of the Cauca Valley with hazy mountains visible in the distance. The main crop here was sugar cane and roadside birds on the extensive grass verges and in the large shade trees included Cattle Egrets, Smooth-billed Anis, Tropical Kingbirds, Ruddy Ground Doves, Eared Doves and a few Bare-faced Ibis.

We passed through Cali city and wound our way up into foothills to San Antonio and our wonderfully comfortable and welcoming guesthouse, the Finca Lolita. We settled in and ate a late, leisurely, huge and delicious breakfast and enjoyed a big rush of birds. A range of hummers at the feeders include White-necked Jacobins, Crowned Woodnymphs, Booted Racquet-tails and a lovely male Purple-throated Woodstar, whilst tanagers included Golden, Scrub and Flame-rumped. Black-billed Thrushes hopped around on the lawn, a trio of Acorn Woodpeckers posed beautifully and a superb Red-faced Spinetail worked its way around a veranda tree.

In the late morning we drove a couple of kilometres up the road and walked a track through some secondary forest to a high viewpoint. It was mild and breezy with a nice mix of sun and cloud and the birding was good. Notables included Andean Pygmy Owl, White-naped Brush-Finch, Azara's Spinetail, Green-and-black Fruiteater, Uniform Antshrike, Red-headed Barbet and two stunning Ornate Hawk-Eagles that came swooping in over the valley and perched in full view in a nearby tree just a little below us – wow!

After a sumptuous lunch and a short break back at the finca we headed out again, this time up some way to the famous KM18. Here we walked along another track through mature secondary forest with great views down across hills patch-worked with forest and farmland. Here we had some great birding action. There were lots of Tanagers (Beryl-spangled, Black-capped, Metallic-green, Fawn-breasted, Saffron-crowned and Blue-winged Mountain) plus Orange-bellied Euphonia, Barred Becard, Montane Woodcreeper, Lineated Foliage-Gleaner, Streaked Xenops, Spectacled Parrotlet, Blackburnian Warbler and Tropical Parula. At the end of the afternoon we returned to Finca Lolita for another delicious dinner before heading off to bed full of impressions from our first very rich day in Colombia.

### Day 3

**Friday 14th October**

After a pre-dawn start we spent the day exploring along the old Buenaventura road which runs down through the remote, forested Ayicocha Valley from the town of Queremal to the Pacific coast. We made a series of stops at

different altitudes, starting in the cool cloud forest at El Descanso and finishing in the lush low-level tropical forest down in Dora. The scenery was consistently spectacular and the forest varied and impressive. The birding was excellent too and the highlights during this very enjoyable day went something like this:

Early/mid am, El Descanso: Rufous-throated, White-lined, and Silver-throated Tanagers, Blue-winged and Black-chinned Mountain-Tanagers, White-whiskered Hermit, Empress Brilliant, Tricoloured and Black-headed Brush-Finches, Black Solitaire, Red-headed Barbet, Canada Warbler and Scale-crested Pygmy-Tyrant.

Late am, lower down: Collared Aracari, Purple-throated Fruitcrow, Tawny-crested and Scarlet-browed Tanagers, Green Thorntail, Scarlet-rumped Cacique, Chestnut-headed Oropendola, Olive-sided Flycatcher and Pacific Antwren.

Early pm, lower down again: Golden-collared Manakin, Rufous-tailed Jacamar, Pacific Flatbill, Cinnamon Becard, Northern Waterthrush and Bay Wren.

Mid/late pm, Dora village and a walk further downstream: White-thighed Swallow, Black-cheeked Woodpecker, White-headed Wren, Wedge-billed Woodcreeper, Scarlet-and-white and Chestnut-winged Tanagers, Scarlet-thighed Dacnis, Choco Toucan and Yellow-margined Flycatcher.

## Day 4

## Saturday 15th October

Colombian Chachalacas eating bananas on the bird table, a Speckled Hummer on the Verbena bushes and a couple of Andean Motmots just down the track made a nice start to the day for us at Finca Lolita before we headed back up to KM18. First we walked along another section of forested track and although it was a rather misty for much of the time we managed to see a good range of interesting birds including a Streak-capped Treehunter, our first Multi-coloured Tanager, a brief Yellow-vented Woodpecker, a Black-billed Peppershrike and a couple of Three-striped Warblers.

Our next stop was at the garden feeding station at nearby Finca Alejandria. The nectar feeders and flowers were buzzing with hummers and we were dazzled by the flashing forms and colours as we watched Fawn-breasted Brilliants, Buff-tailed Coronets, Brown Violetears, Booted Racquet-tails, Long-tailed Sylphs, Andean Emeralds, Purple-throated Woodstars and a stunning male Blue-headed Sapphire. Multi-coloured, Blue-capped, Golden-naped and Saffron-crowned Tanagers added to the excitement and walks down the lane below the finca either side of lunch added Whiskered Wren, Rusty-winged Barbtail, Purplish Mantled and Metallic-green Tanagers, Andean Solitaire and a superb Scaled Fruiteater.

At the end of the afternoon, after a nice wee break back at Finca Lolita, we set off northwards up the Cauca Valley towards Buga. A ferocious electrical storm made this a notable journey and delayed us somewhat but we ultimately arrived at our hotel, a fine old Spanish colonial building in the centre of town, in good time and enjoyed an excellent dinner at a local pizzeria.

## Day 5

## Sunday 16th October

We were up and away from Buga just before first light and continued driving north up the valley through flat farmland flanked by the Pacific range to our left and the central range to our right. It was a beautiful dawn and an enjoyable drive, with the sun rising over one ridge of mountains whilst the full moon set over the other. After an hour or so we turned north-west up into the Pacific range and stopped for a brief roadside leg-stretch where we saw Spectacled Parrotlets, Red-crowned Woodpecker, Yellow-bellied Elaenia, Fork-tailed Flycatcher and Red-breasted Blackbird.

A little later we stopped for breakfast at a café in the picturesque hill town of Apia just as it was waking up to its Sunday morning, then we continued on to Pueblo Rico where we transferred into a couple of 4x4 pick-ups trucks for the last stage of the journey up to Montezuma Lodge and the Tatama National Park.

Montezuma enjoys a splendid setting amongst steeply forested hills just below the National park entrance and no sooner had we arrived than we were watching another set of Hummers buzzing around another feeding station. New species included Green-crowned Brilliant, White-tailed Hillstar, Purple-bibbed White-tip and Violet-tailed Sylph whilst the bananas were drawing in Thick-billed Euphonias and a couple of smart Crimson-backed Tanagers.

After a suitable break we set off up the track into the national park taking a packed lunch with us and spent the rest of the day exploring along the track at the lower altitudes. The forest was really lovely but the lushness of the vegetation and the poor light in the heavily overcast conditions made for some challenging birding. Nevertheless, through the course of the afternoon we enjoyed quality sightings of such gems as Orange-breasted Fruiteater, Masked Trogon, Emerald Toucanet, Bi-coloured Ant-Vireo, Ornate Flycatcher, Bronze-Olive Pygmy-Tyrant, Crested Ant-Tanager and Glittering-green Tanager.

## Day 6

## Monday 17th October

Today we drove as far up the track as we could to an altitude of around 2500m where, just after dawn, we were treated to wonderful views of the mountain tops around us poking out of a rolling sea of mist in the valleys below. We were in elfin forest and paramo and the bird population reflected this: in a short space of time we saw Munchique Wood-Wren, Chestnut-bellied Flowerpiercer, Purple-backed Thornbill and Rufous Spinetail. Dropping down into the cloud forest zone we started to see a wider range of other species and a productive morning produced Golden-fronted Whitestart, Grass-green, Purplish-Mantled and Gold-Ringed Tanagers, White-sided and Bluish Flowerpiercers, Yellow-bellied Chat-Tyrant, Black-throated Tody-Tyrant and Fulvous-dotted Treerunner. Hummers meanwhile included Collared Inca, Greenish Puffleg and Tourmaline Sunangel.

We stopped to eat our lunch just as some heavy rain set in and as it showed no sign of abating we dropped down to the 2000 metre mark to escape it and found a Fulvous-breasted Flatbill, an Olive Finch and a nest-building Tawny-breasted Hermit. The rain caught up with us again and so we dropped right back down to the river near the lodge where we finished the day with an exciting range of sightings that included Golden-winged and Club-winged Manakins, Zelendon's Antbird, Spotted Woodcreeper, Golden-bellied Warbler, Yellow-throated Bush-Tanager and Blue-necked Tanager.

## Day 7

## Tuesday 18th October

A very wet dawn thwarted our plans to explore the mid-altitude zone above the lodge. After a short soggy excursion during which we saw very little we returned to an early breakfast and some watching from the shelter of the dining area followed by a short walk through some of the open grass and scrub around the lodge. New birds included a Brown Inca, a Common Tody-Flycatcher, a Dusky-capped Flycatcher, a couple of Slaty-Spinetails and a gang of Dusky-faced Tanagers.

We left Montezuma just after 9am and were back in Pueblo Rico by 10. Here we were reunited with our minibus and our driver Hector and drove on to the town of Serritos where we enjoyed a restaurant lunch and a couple of Tropical Gnatcatchers as they flitted around in the car park trees. From here we drove on through the city of Pereira and so to the Otum Quimbaya reserve. We were on the western slope of the central range now and this mid-level forest with its tall trees, Wax Palms and abundance of bromeliads had a different feel to the denser, more humid forests of Tatama. There were some different birds too and during the afternoon we saw an exciting range of species highlighted by Cauca and Sickie-winged Guans, Andean Motmot, Bronzy Inca, Bar-crested Antshrike, Spotted Barbtail, Rufous-breasted Flycatcher and Crested Ant-Tanager.

## Day 8

## Wednesday 19th October

We were up before dawn again and with a Tropical Screech Owl bubbling away unseen in the darkness we left Otum Quimbaya behind us and took to the road again. At first light we were driving through the city of Manizales and a little later we were winding our way up to the 4000 metre mark and the Los Nevados National Park. We made a series of stops during the day as we explored the paramo, elfin forest and cloud forest zones of this wonderful area. The air was thin and it was surprisingly cold but the scenery was fantastic, the vegetation extraordinary and the birds wonderful. Among the many highlights were: Tawny Antpitta, Stout-billed Cinclodes, Andean Tit-Spinetail, Red-crested Cotinga, Black-crested Warbler, Golden-fronted Whitestart, Pale-naped and Slaty Brush-Finches, Scarlet-bellied and Lacrimose Mountain-Tanagers and the dazzling Golden-crowned Tanager.

Hummers were much in evidence too and included such stunners as Buffy Helmetcrest, Shining Sunbeam, Mountain Velvetbreast, Golden-breasted Puffleg and the astonishing Rainbow-bearded Thornbill. Many of these and more were seen at a feeding station at our lunch stop at the Termales del Ruiz hotel with its steaming hot springs. Here we enjoyed one of the absolute highlights of the tour when a female Sword-billed Hummingbird came in to the feeders and was intercepted by two hostile Great Sapphirewings. The three fenced with their bills in mid-air before the Sapphirewings, outgunned by the Sword-bill's greater reach, lost heart and left her to it – amazing!

## Day 9

## Thursday 20th October

After a night in a comfortable modern hotel in Manizales we set out at first light for the Rio Blanco reserve which lies just a short distance outside town. This lovely piece of forest, situated at around 2,500 metres altitude was a wonderful place to spend the day. We started with breakfast at the rustic little lodge in the heart of the reserve where the nectar feeders and flowering shrubs were drawing in another dazzling array of hummers. Here

we enjoyed fabulous views of Collared Incas, Tourmaline Sunangels, Speckled Hummingbirds, Buff-tailed Coronets, Long-tailed Sylphs and White-bellied Woodstars.

After breakfast we set off with local warden Carlos and a bucket of worms and in an astonishing couple of hours we were treated to fabulous views of four species of Antpitta (Brown-banded, Chestnut-capped, Slate-crowned and Bi-coloured) that Carlos called in to his makeshift feeding stations. What a fantastic experience! After this we set off walking the tracks and encountered a satisfying range of exciting birds that included Collared Trogon, Crimson-Mantled Woodpecker, Strong-billed Woodcreeper, Black-collared Jay, Rufous-crowned Tody-Tyrant, Grey-browed Brush-Finch and a pair of brief fly-past Golden-plumed Parakeets. A top highlight came in the mid-afternoon when a quartet of superb Black-billed Mountain-Toucans worked their way through the tree tops vocalising noisily and we finished the day by the river down at the reserve entrance where we found three White-capped Dippers.

## Day 10

Friday 21st October

A pre-breakfast walk around the grounds of our hotel in Manizales produced some notable birds. Top of the list were a Flammulated Treehunter, several Black-eared Hemispingus, a Slaty-backed Chat-Tyrant, a Russet-crowned Warbler, some noisy Black-winged Saltators and an Emerald Toucanet. With breakfast completed we headed off to the Embalse de Camaguadua near the small town of Chinchina. Here a couple of moderate sized lakes with surrounding grassland, scrub and marsh provided rich pickings and in the fine warm sunshine we had an excellent morning and found a wide range of birds. Wetland species included various herons and ducks plus Pied-billed Grebe, Solitary and Least Sandpipers, Lesser Yellowlegs, Purple Gallinule, Wattled Jacana, Blackish Rail and three species of Kingfisher. Birds in the bushes and trees included Spectacled Parrotlet, Pale-breasted Spinetail, Red-crowned Woodpecker, Sooty-headed Tyrannulet, Pied Water-Tyrant, Mourning Warbler, Slate-coloured Seedeater and a neat little Greyish Piculet poking its head out of its tiny nest hole in a lake shore tree.

After lunch in a restaurant in Chinchina and a further short session at the lakes we headed off to Pereira airport. We arrived in good time for our flight, everything went smoothly and we all arrived safely in Bogota a little later. From here some of the group went on to connect with an overnight flight back to the UK whilst others (myself included) headed into Bogota for the night ready to head up to Santa Marta the following day... Naturetrek's first Colombia tour had been successfully completed!

## Day 11

Saturday 22nd October

Overnight flight and arrive back in the UK

## Acknowledgements

Thanks to Johnnier for his very positive help throughout; To Fernay our local agent for his good natured and efficient behind-the-scenes fixing; to Hector our main driver; to "Antpitta" Carlos at Rio Blanco for a very memorable morning and to everyone else who helped to make our tour around this small corner of Colombia so successful and enjoyable. Thanks also to all the members of the group for their good humour and spirit of adventure!

## Species Lists

Birds (h = heard only. E = endemic; NE = near endemic; V = vulnerable; NT = near threatened; CR = critically endangered)

	Common name	Scientific name	October								
			13	14	15	16	17	18	19	20	21
1	Black-bellied Whistling Duck	<i>Dendrocyna automnalis</i>				2					
2	Fulvous Whistling Duck	<i>Dendrocygna bicolor</i>									2
3	Andean Teal	<i>Anas andium</i>							3		
4	Blue-winged Teal	<i>Anas discors</i>				1					200
5	Ruddy Duck	<i>Oxyura jamaicensis</i>							3		1
6	Colombian Chachalaca	<i>Ortalis columbiana</i>	2		6						
7	Cauca Guan E/ EN	<i>Penelope perspicax</i>						10			
8	Sickle-winged Guan	<i>Chamaepetes goudotii</i>				1		4	1	1	1
9	Chestnut Wood-Quail E/ NT	<i>Odontophorus hyperythrus</i>			h					h	
10	Neotropic Cormorant	<i>Phalacrocorax brasilianus</i>		5		1					50
11	Pied-billed Grebe	<i>Podilymbus podiceps</i>									10
12	Great Egret	<i>Ardea alba</i>						1	1		2
13	Cocoi Heron	<i>Ardea cocoi</i>				1					1
14	Black-crowned Night Heron	<i>Nycticorax nycticorax</i>									1
15	Snowy Egret	<i>Egretta thula</i>				1					6
16	Little Blue Heron	<i>Egretta caerulea</i>									2
17	Cattle Egret	<i>Bubulcus ibis</i>	10		4	100		60	100's	10	15
18	Striated Heron	<i>Butorides striata</i>				1					5
19	Bare-faced Ibis	<i>Phimosus infuscatus</i>	2			10		20			100
20	Black Vulture	<i>Coragyps atratus</i>	6	30	15	50		100	25	10	50
21	Turkey Vulture	<i>Cathartes aura</i>		6			1				
22	Osprey	<i>Pandion haliaetus</i>									2
23	Ornate Hawk-Eagle	<i>Spizaetus ornatus</i>	2								
24	Roadside Hawk	<i>Rupornis magnirostris</i>				2		2	1	4	1
25	Broad-winged Hawk	<i>Buteo platypterus</i>									6
26	Blackish Rail	<i>Pardirallus nigricans</i>					2				2
27	Common Gallinule	<i>Gallinula galeata</i>									10
28	Purple Gallinule	<i>Porphyrio martinicus</i>									6

	Common name	Scientific name	October								
			13	14	15	16	17	18	19	20	21
29	American Coot	<i>Fulica americana</i>									2
