Summary

No matter what the weather might decide to throw our way, Mallorca always manages to produce some great wildlife experiences among fabulous landscapes. This year, we mostly had the typical, warm and sunny weather that Mallorca enjoys in early autumn, but we were also submitted to a remarkable downpour mid-week, which saw the police and fire brigade out in force and cars gingerly making their way through the flooded streets of Alcudia. Such events happen from time to time and have a greater effect on the sun-worshippers than on us, as we enjoyed the resulting influx of migratory birds that followed! Birds provided us with plenty to enjoy, a few butterflies were still on the wing and an interesting mix of late-flowering plants from the summer season ensured there was always much to look at.

Day 1

Saturday 18th September

Our various flights all arrived at Palma Airport from the UK in a timely fashion, and we soldiered on through the temporary covid regulations and checks, to eventually arrive at the car rental desk. Things took a little longer than hoped here, but eventually we figured out all the new regulations, got ourselves sorted in the vehicles and took a trouble-free trip across the island to our hotel. Our arrival was a little later than originally planned, but we were just in time for last knockings at dinner and enjoyed a wonderful array of food that was to be a regular feature of our evenings here.

Day 2

Sunday 19th September

A few of us made the walk out to the hotel viewing platform before breakfast, where small, pipistrelle-type bats were still hunting in the half-light and Water Rails called unseen from the marsh. Cetti's Warblers functioned nicely as early morning alarm calls and were to continue to do so for the rest of the week. All breakfasted out, we made a quick stop for lunch provisions before heading into the Boquer Valley. Even before we left the car park, we had added Booted Eagle and Cinereous (Black) Vulture to our day's tally. Some of the group stayed to look for migrants around the finca and turned up a nice suite of Common Redstarts, Mediterranean Flycatchers, Stonechats and the first Hoopoe of the week. For those heading further up the valley, Blue Rock Thrush and Crag Martin were nice rewards, while some of the local plant specialities included Balearic Moneywort, Majorcan Spiny Germander and Balearic Milk-vetch. Some fine stands of Sea Squill were also much admired and photographed.

We took our picnic nearby under the shade of some large Aleppo Pines, with European Serin and Hoopoe for company, then headed back to base for some R&R during the hottest part of the day. In the afternoon, we made a brief hop to the southern part of the Albufereta – the wetland that lies close to our hotel. A nice array of birds was here, including an Osprey, a good range of herons and egrets (including a juvenile Purple Heron), several Black-winged Stilts, two Pied Avocets and an assortment of other waterbirds. Also here, we had a wonderful close encounter with a Firecrest.

Day 3

Monday 20th September

We set off a little earlier today, to tackle the twisting and very scenic road that leads right to the end of the Formentor peninsula and its sentinel lighthouse. Leaving early meant that the road was relatively clear of other traffic, and we soon found parking spaces that would allow an easy departure once the time came. Soon, we were finding ourselves enjoying what we had come for – magnificent Eleonora's Falcons. A number of these graceful birds were patrolling the skies and we even witnessed some tussles with a local Peregrine! Offshore was a little quiet for birds, though brief glimpses of Blue-fin Tuna feeding were exciting. A few migrant flycatchers and warblers were in the trees, while local plant specialities included *Launaea cervicornis* and *Limonium minutum* – two cushion-like endemics that were hugging the rock faces.

On the way back, we took a little time out to stop off at Casas Velles to see what birds might be around. We discovered quite a few Red Crossbills (of the Iberian form *balearica*) skitting around and feeding in the trees but, though they called almost continually, we never did manage to really get a good look at one. After another picnic lunch back at S'Albufereta, we took our afternoon siesta, before visiting a different part of the local wetlands, this time to the north of our hotel. Unfortunately, the pools in this section were all dry and therefore devoid of wetland birds, but we nevertheless found things to enjoy, including a few Sardinian Warblers, Zitting Cisticolas and a range of beetles and other interesting beasts that were lurking under rocks. Of particular interest were a pair of stripy weevils (*Coniocleonus nigrosuturatus*) of a species that is apparently rather rare in much of its range.

Day 4

Tuesday 21st September

After yesterday's gorgeous, sunny skies, the events of today could barely have been predicted! We began with a short sojourn at the hotel platform that overlooks the marsh and enjoyed the now-familiar Cetti's Warblers, Grey Herons, roosting egrets and Marsh Harriers that were becoming a regular feature. After breakfast, we headed through Alcudia to visit some of the smaller wetland areas around the periphery of the Albufera Reserve. A few local showers were blowing in but we felt that the worst had passed and the day looked set to brighten up as we arrived at S'Illot. However, we couldn't have been more wrong as, almost as soon as the group were out of the vehicles, the heavens opened and an almighty deluge came down upon us. Soaked within just a few moments, we decided to call things off for a while until the worst had passed us by, which proved to be a good move! Heading back through Alcudia, the streets were awash and broken-down cars were sitting in the road as fire engines and police sirens filled the air. With a higher vehicle, we probably fared better than most and we were able to make our way through the flooded streets and eventually head back to the hotel. Back at base, we could find other things to do for a while and we had lunch on one of the main patios as the last of the rain headed away.

It had been quite a morning, but the now-flooded fields proved to be attractive to a lot of birds as we headed out to the southern part of S'Albufereta. Tracks that we had walked previously were now under water and a few stepping-stones were required in places, but there were birds to be seen. Three Stone-curlews were soon found and seen very well through our scopes, while Hoopoes were seeking out crickets that had been flooded out of their burrows. The various pools now held a Ruff, a small party of Dunlin, three Kentish Plovers, at least a dozen Greenshanks and a party of 11 Greater Flamingos. After our visit to the various hides and viewing platforms, we took a circular route back to the hotel to check the weedy farm fields in the area. This turned up our first Whinchat of the week, another fine pair of Stone-curlews and several active flocks of European Serins.

Day 5

Wednesday 22nd September

Today saw a return to normality after yesterday's biblical downpour and we headed out to S'Albufera under cloudy but slowly clearing skies for a full day at Mallorca's largest wetland reserve. Parking up, we loaded up with lunch provisions and headed off for the walk into the reserve. Almost immediately, the tail-enders of the group managed to spot a Little Bittern in one of the reed-fringed ditches, while an array of herons, egrets and other wetland birds criss-crossed overhead, including three Black-crowned Night Herons. At the information centre, we sorted out paperwork then split into two groups so that we could make best use of the system of hides (but we still maintained radio contact!). We were soon engrossed in a mass of birds, with large numbers of loafing ducks on the pools and islands. Most were Eurasian Teal, but there were Northern Shoveler and Gadwall, too, while careful searching eventually turned up a male Garganey and two Marbled Ducks. The mighty Western Swamphens put on a good show and groups of Little Ringed Plovers trotted about. Perhaps most unexpected was an Osprey that chose to sit in full view, very close to the hides for almost the entire time that we were at this part of the reserve. A good selection of waders appeared, including some obliging Common Snipe, Wood, Green and Common Sandpipers and two Black-tailed Godwits.

After lunch in the shade (and a fine Hoopoe for Alan's camera!) we spent the afternoon in a different set of hides, this time looking out over saltier pools and finding a slightly different suite of birds. Wooden posts provided resting spots for an Audouin's Gull and a juvenile Black Tern – with the latter also giving great flight views as it dipped for insects in front of us. Spotted Redshanks, another five Marbled Ducks and two more Ospreys were among the highlights here, but we were all outdone by Erica who had waited back at the stone bridges and managed to photograph a very close Red-knobbed Coot. We had all had a very full and productive day, rounded off for some by the presence of some lovely Audouin's Gulls that were taking a bath in the main canal beside the entrance track.

Day 6

Thursday 23rd September

The day started rather dull and cloudy but was to improve greatly later and it didn't curtail our platform visit, which this morning revealed a fine flock of 28 Greater Flamingos wheeling around the marsh. We had decided to make a return visit to the Boquer Valley to seek out Balearic Warblers, a species that we had missed on our earlier visit. The weather was not overly helpful at first, while the clayey ground had become quite sticky after Tuesday's rain, but while some chose to look for migrants around the finca again, the resolute few pushed on up the valley and, after careful searching, we did indeed manage to turn up a couple of obliging – though skittish – Balearic Warblers.

From here, we headed off in the opposite direction from the hotel and circled around to the fields in the vicinity of the local water treatment works. There were plenty of birds to see here, including three Hoopoes along the roadside, followed by a cluster of Northern Wheatears, Whinchats and Yellow Wagtails of assorted forms, including some of the local 'Iberian Wagtails'. Little Ringed Plovers were also in one of the fields and a juvenile Woodchat Shrike of the local race '*badins*' was found and photographed by some. At the lunch stop, we had a panoramic view over the treatment works and found a good number of Teal and Shoveler present as well as some introduced, Red-eared Terrapins. A highlight on the wet field in front of us was a Glossy Ibis, along with two Little Stints. Dragonflies were taking advantage of the rainwater lying on the fields, with many Red-veined Darters and Lesser Emperors hunting or egg-laying, while a single Vagrant Emperor was a nice bonus, too.

We finished our day with a return to S'Illot, this time in far better weather. A party of five Dunlin and a juvenile Bar-tailed Godwit were nice additions to the list here, along with a single Marbled Duck. A Mole Cricket was also a nice find, presumably having been washed out of its burrow by the weather and now looking for a new home.

Day 7

Friday 24th September

Our last full day began with us paying a dutiful visit to the platform before breakfast to watch the day wake up as birds spread out from roosts, the olive-eating ducks did their bit and the Water Rails continued to call unseen from the marsh. Today we headed for the hills and took a scenic drive through the wonderful limestone landscapes of the Tramuntana mountains. Our journey took us as far as the Cuber Reservoir, a location that offers one of the few opportunities along this route to be able to park and have a walk. Despite rather low cloud blowing in and out and largely obscuring Mallorca's highest peak, Puig Major, we were able to find a nice selection of raptors to enjoy, including both Cinereous and Griffon Vultures, which were two of the specialities that we were hoping for here. Booted Eagles also showed nicely and Ravens 'cronked' overhead. A Wryneck proved to be quite obliging and perched for scope views while Sardinian Warblers and parties of European Goldfinches fed nearby. Red Crossbills were almost constantly audible, but we had to wait until we were back at our lunch stop before they revealed themselves properly to us.

The rocky scree gave us a chance to see a nice array of mountain plants and regional endemics, including Rustyback Fern, Southern Polypody, Balearic St John's-wort and the wonderful Balearic Crocus, among others. Stomachs were rumbling and lunch beckoned as we strolled back along the main path.

In the afternoon, we paid a visit to Lluc Monastery, which dates back to the 13th Century and still functions as a pilgrimage and sanctuary today. We wandered the passageways, basilica and great halls and visited the interesting botanical collection of mostly native plants – while the nearby café did well out of us, too!

Day 8

Saturday 25th September

The inevitable last day soon came around and there was much packing to do and arrangements to be made, but we still had time for a quick morning drive, so we headed for the mirador at Albercutx for a final immersion in Mallorcan warmth, sunshine and spectacular views. We enjoyed the views along with the local goats and we even got in a final session of great birding as we enjoyed more Eleonora's Falcons, Crag Martins, Blue Rock Thrush and a couple of Balearic Warblers not too far away.

It had been a fabulous week, thanks to a wonderful group, as well as the care and attention of the hotel staff, who made great efforts to ensure that we were all safe and looked after, as we head (hopefully!) out of the pandemic and back to some semblance of normality. Thanks to everyone for making this a memorable and fun trip and hopefully we'll meet again soon.

95	European Greenfinch	<i>Chloris chloris</i>		4	3	2	10	5		
96	Red Crossbill	<i>Loxia curvirostra</i>			10+				15+	
97	European Goldfinch	<i>Carduelis carduelis</i>		✓	✓	✓	✓	✓	30+	
98	European Serin	<i>Serinus serinus</i>		2	1	20	H	✓		H

	Common name	Scientific name	September							
			18	19	20	21	22	23	24	25
99	Corn Bunting	<i>Emberiza calandra</i>						2		

Mammals

1	European Rabbit	<i>Oryctolagus cuniculus</i>					✓			
2	Brown Rat	<i>Rattus norvegicus</i>				✓	✓			

Reptiles & Amphibians

1	Stripeless Tree Frog	<i>Hyla meridionalis</i>						H		
2	Turkish Gecko	<i>Hemidactylus turcicus</i>	✓	✓	✓	✓	✓	✓	✓	
3	Moorish Gecko	<i>Tarentola mauritanica</i>					✓			
4	Red-eared Terrapin	<i>Trachemys scripta</i>						3		

Butterflies

1	Swallowtail	<i>Papilio machaon</i>		✓				✓		
2	Cleopatra	<i>Gonepteryx cleopatra</i>					✓			
3	Clouded Yellow	<i>Colias crocea</i>					✓	✓	✓	
4	Small White	<i>Artogeia rapae</i>			✓			✓		
5	Lang's Short-tailed Blue	<i>Leptotes pirithous</i>		✓	✓		✓		✓	
6	Red Admiral	<i>Vanessa atalanta</i>					✓			
7	Two-tailed Pasha	<i>Charaxes jacius</i>			✓					
8	Speckled Wood	<i>Pararge aegeria</i>					✓		✓	
9	Meadow Brown	<i>Maniola jurtina</i>			✓			✓		

Dragonflies

1	Western Willow Spreadwing	<i>Chalcolestes viridis</i>							✓	
2	Blue Emperor	<i>Anax imperator</i>					✓			
3	Lesser Emperor	<i>Anax parthenope</i>			✓		✓	✓		
4	Vagrant Emperor	<i>Anax ephippiger</i>						✓		
5	Red veined Darter	<i>Sympetrum fonscolombii</i>						✓	✓	✓

Other creatures of interest

(Mostly with thanks to Erica's rummagings!)

American Blue Crab *Callinectes sapidus*

Tarantula Wolf Spider *Lycosa tarantula*

European Mole Cricket *Gryllotalpa gryllotalpa*

European Field Cricket *Gryllus campestris*

Lamenting Grasshopper *Eyprepocnemis plorans*

European Paper Wasp *Polistes dominula*

Weevil sp. *Megascolia bidens*

mammoth wasp sp. *Megascolia bidens*

cuckoo bee sp. *Thyreus histrionicus*

Hummingbird Hawk-moth *Macroglossum stellatarum*

Flora

A nice selection of plants was noted during the course of the week, with a little over 200 species listed in total. For brevity, here's a list of those species that particularly caught our eye or which are of special interest in being endemic to the region.

Rustyback Fern	<i>Asplenium ceterach</i>	Cuber
Southern Polypody	<i>Polypodium cambricum</i>	Cuber
Fragile Joint-pine	<i>Ephedra fragilis</i>	Formentor
Aleppo Pine	<i>Pinus halepensis</i>	
Common Smilax	<i>Smilax aspera</i>	
Balearic Crocus	<i>Crocus cambessedesii</i>	Cuber
	<i>Asphodelus aestivus</i>	
Sea Daffodil	<i>Pancratium maritimum</i>	Port de Pollenca
Sea Squill	<i>Drimia maritima</i>	Boquer Valley
	<i>Asparagus acutifolius</i>	
	<i>Asparagus horridus</i>	S'Albufereta
Dwarf Fan Palm	<i>Chamaerops humilis</i>	Boquer
Sharp Rush	<i>Juncus acutus</i>	Wetlands
Small Caltrops	<i>Tribulus terrestris</i>	Boquer Valley
Carob	<i>Ceratonia siliqua</i>	Boquer Valley
Balearic Milk-vetch	<i>Astragalus balearicus</i>	Boquer Valley
Squirting Cucumber	<i>Ecballium elaterium</i>	Hotel
Balearic St John's-wort	<i>Hypericum balearicum</i>	Boquer Valley
Pomegranate	<i>Punica granatum</i>	Boquer Valley
Lentisc	<i>Pistacia lentiscus</i>	
American Pokeweed	<i>Phytolacca americana</i>	Lluc
	<i>Erica multiflora</i>	Lluc
Mediterranean Strawberry Tree	<i>Arbutus unedo</i>	
Oleander	<i>Nerium oleander</i>	Roadsides
European Heliotrope	<i>Heliotropium europaeum</i>	Boquer Valley
Balearic Moneywort	<i>Sibthorpia africana</i>	Boquer Valley
Common Vervain	<i>Verbena officinalis</i>	S'Albufereta
	<i>Micromeria filiformis</i>	Boquer Valley
Majorcan Spiny Germander	<i>Teucrium subspinosum</i>	Albercutx
	<i>Phlomis italica</i>	Boquer Valley
Flat-topped Carlina Thistle	<i>Carlina corymbosa</i>	Cuber
Golden Thistle	<i>Scolymus hispanicus</i>	Cuber
Slender Blue Lettuce	<i>Lactuca tenerrima</i>	Cuber
	<i>Bellis sylvestris</i>	Cuber
	<i>Artemisia caerulescens</i>	S'Albufereta
Golden-samphire	<i>Limbarda crithmoides</i>	Wetlands
Field Eryngo	<i>Eryngium campestre</i>	Cuber
