## Day 1

**Saturday 8th November**

### Departure

We arrived in Addis Ababa in the early morning and were taken to the hotel for a short period of freshening up, before setting off on some relatively local birding. The first stop was Bishoftu Lake, viewed from the Dreamland Hotel terrace, followed by stops along the shore of Cheleklek Lake.

The hotel terrace provided great views of the antics of the nesting Marabou Storks, and some very close views of various passerines, including African Dusky Flycatcher, Ethiopian Bee-eater, Red-billed Firefinch, Tawny-flanked Prinia and Yellow-bellied Waxbill. Cheleklek produced some waterfowl (including both Red-billed and Blue-billed Teals) and waders not seen elsewhere on the trip, as well as distant views of Black Crowned Crane. In total, some 65 species were seen, making the day a good introduction. We were dropped back at the hotel for a late lunch.

## Day 2

**Sunday 9th November**

### Arrival at Yabelo

Refreshed after sixteen hours of continuous sleep (!), we were collected from the hotel for the trip to the airport to fly to Yabelo, where we arrived at just after 1.00pm.

We then headed into the scrub about 10km north-east of Yabelo for our first experience of the wonderful birding in that area, with about 60 species seen in the three hours before sunset. Birds included Nubian and Cardinal Woodpeckers, five species of weaver, four species of starling, Yellow-bellied Eremomela, Red-tailed Shrike, Red-bellied Parrot, Speckled and Blue-naped Mousebirds, and Rosy-patched Bushshrike. Mammals included Common Dwarf Mongoose and Unstriped Ground Squirrel.

## Day 3

**Monday 10th November**

### Drive to Mega

We made an early (5.30am) start to travel 100km south-east to Mega. The first stop in the gorge south-east of the town was mainly for Black-fronted Francolin, which did not show, possibly due to the amount of Augur Buzzard activity.

This did not impact on an absolutely wonderful day's birding, with that stop, plus others later in the day to the north-west of Mega and back near Yabelo, producing a total for the day of 103 species, together with Vervet Monkey, Olive Baboon, Common Warthog, Greater and Lesser Kudus, and Guenther's Dik-dik. The birding highlights included the endemic Stresemann's Bushcrow and White-tailed Swallow, but there were also great views of Black-capped Social Weaver, Crested Francolin, Crowned Lapwing, Cut-throat Finch, Pale Prinia, Purple Grenadier and Tawny Eagle, to name just a few.

## Day 4

Tuesday 11th November

### Meta Gafersa

We made another early start, this time to travel around 80km east to Meta Gafersa. Here, the first objective was the endemic Ruspoli's Turaco, which we saw wonderfully at close range in some very productive woodland.

After breakfast we searched for another endemic, Salvadori's Seedeater, which gave fleeting views. The return journey produced a delightful Pygmy Falcon, and the regional speciality of White-crowned Starling. After a trip to Yabelo airport, we visited nearby scrubland where we stayed until dusk, at which point a small herd of Plains Zebra appeared, unconcerned by our presence. It was another productive day, with 83 species seen.

## Day 5

Wednesday 12th November

### Drive to Arba Minch

We left early to say a sad farewell to Yabelo, and to make the almost 200km journey north-west to Arba Minch. The first birding stop was in the Borana National Park, particularly for various starling species (especially Golden-breasted and Magpie Starlings), but it also produced a vast flock of Vulturine Guineafowl, and close views of many scrubland birds, including Parrot-billed Sparrow.

Banded Barbet

African Dusky Flycatcher

Blanford's (Erlanger's) Lark

Black-winged Lovebird

After breakfast at the Kanta Lodge, complete with nesting African Citril, we visited the Segen people's village, also near Konso/Karat. We then travelled on to Arba Minch, down from the Konso uplands into the Rift Valley. We

reached increasingly lush and prosperous areas (thanks to their bananas), and arriving at the lovely Haile Resort in Arba Minch for a late lunch. This day was, inevitably, dominated by travel, but 54 species were still seen.

## Day 6

Thursday 13th November

### Lake Chamo

With only local travel to do, we had a much more relaxed start to the day, before heading down to Lake Chamo, first for a boat trip on the lake, and second for a short walk along the shore. The boat trip allowed close views of a hunting African Fish Eagle, as well as Osprey and Northern Carmine Bee-eater.

The destination for the trip was an island with some exceptionally large Nile Crocodiles, but also Goliath Heron and, interestingly, a pair of Jackson's Hornbills, well outside their usual mapped range. The shore provided a close encounter with a Hippopotamus. The afternoon was taken up with a visit to a village of the Dorze people. 59 species were seen today.

## Day 7

Friday 14th November

### Drive to Hawassa

This was another day with a significant drive, the roughly 160km from Arba Minch to Hawassa (moving from one hotel in the Haile Resort chain to another). The journey was broken with a coffee stop in Wolaita Sodo, where the hotel grounds had many birds including various sunbirds, flycatchers, Red-throated Rock Martin and Abyssinian White-eye.

We arrived in Hawassa mid-afternoon. The lakeside grounds of the hotel offered many bird species, with wonderful, extremely close-range views of Malachite and Pied Kingfishers. 61 species were seen during the day, the quiet travel section boosted by the diversity at Hawassa Lake.

## Day 8

Saturday 15th November

### Wondo Genet

A moderately early start, limited by hotel breakfast hours, allowed us to be at Wondo Genet by 8.30am. Here, a local guide led a walk through the forests on the slopes of the eastern margin of the Rift Valley.

This walk was undoubtedly one of the highlights of the trip, with birds such as Narina Tropicbird, Tambourine Dove, White-cheeked Turaco, Crowned Eagle, Black (Great) Sparrowhawk, and the endemic Yellow-fronted Parrot.

After lunch back at the hotel, the late afternoon was spent in the Amora Gedel Park in Hawassa. This park has Grivet Monkey, Nile Monitor, and even a resident pack of Spotted Hyaena. The birding highlights were Black Crake and African Spotted Creeper, with wonderfully close views in the evening light of African Fish Eagle, Ethiopian Bee-eater, Double-toothed Barbet and the near-endemic Banded Barbet. A wonderful day's birding produced a total of 80 species.

## Day 9

Sunday 16th November

### Hawassa fish market and drive to Robe

The first visit of the day was to the Hawassa fish market, with Great White Pelican, Gull-billed and Whiskered Terns, Grey-headed and Black-headed Gulls, Yellow-billed and Marabou Storks, and many other waterbirds. A quick coffee stop nearby produced nesting near-endemic Black-winged Lovebirds.

Ethiopian Siskin

African Fish Eagles

This was another day with a substantial amount of travel, along a fascinating and scenic route, passing out of the Rift Valley, first into the wheat-growing areas near Dodala, where we made a stop for the endemic 'Erlanger's Lark' (now treated as a subspecies of Blanford's Lark) and the near-endemic Rusty-breasted Wheatear, then over the high pass (3500m) east of Washa, and finally down into the grassland basin around Dinsho. Several stops in this area produced Cape Eagle-Owl, and two endemics (Abyssinian Longclaw and Blue-winged Goose), together with two near-endemics (Rouget's Rail and Abyssinian Owl). The grasslands also led to close encounters with Common Warthog, Mountain Nyala and Bohor Reedbuck. The night was spent at a small hotel in Robe.

## Day 10

Monday 17th November

### Bale Mountains and Harennna Forest

Today involved travelling into the Bale Mountains, passing over the Sanetti Plateau, and dropping down into the edge of the Harennna Forest to the south. The travel up the north side of the mountains produced Rouget's Rail, Wattled Ibis and the endemic Ethiopian Siskin, among others.

The first proper stop was at a pond on the edge of the plateau, with Red-throated Pipit, Thekla's Lark, the endemic Blue-winged Goose and Spot-breasted Lapwing, and our first (distant) Ethiopian Wolf. Crossing the plateau produced an enormous number of raptors, including Lanner Falcon, Pallid Harrier, Golden, Tawny and Steppe Eagles, as well as the ubiquitous Augur Buzzard.

Dropping down into the forest, we added Ayres's Hawk-Eagle and Mountain Buzzard. The forest also produced African Emerald Cuckoo and Abyssinian Catbird, the latter another endemic. While in the forest, we were able to visit the Bale Mountain Lodge, where we would have been staying, had it not been taken over by the government and closed just a few weeks previously. At the lodge we heard, but did not see, the Bale Monkey. We returned over the mountains to different accommodation, the Wabe Shebele Hotel in Goba. Mammals seen during the day

included Guereza, Mountain Nyala and Klipspringer, as well as the endemic plateau specialists Starck's Hare, Blick's Grass Rat and Giant Mole-rat. The uplands support a lower diversity of birds, so the daily total was just 54 species.

## Day 11

**Tuesday 18th November**

### Senetti Plateau

The day started with a walk through some farmland on the lower slopes, just above Goba. This gave wonderful views of Rüppell's Robin-Chat and White-backed Black Tit, among others.

Although this is usually a good spot for Abyssinian Woodpecker, this species evaded us. We progressed back up onto the Senetti Plateau. During lunch overlooking a lake, we were surprised to be able to add both African Fish Eagle and Northern Pintail to the day's list. After touring around the plateau to locate them, we had wonderful views of Ethiopian Wolf at extremely close range. A pair of Wattled Cranes was seen briefly, and to finish the day a group of endemic Moorland Francolins was found and seen well.

## Day 12

**Wednesday 19th November**

### Addis Ababa and flights home

After a short walk around the grounds of the hotel, it was time to head for Goba airport. Lunch was at the hotel, and then we went to the National Museum of Ethiopia. The exhibition of the early hominid remains was excellent: a visit to Ethiopia would not be complete without seeing this! In the evening there was a farewell meal, before we headed back to the airport for the flight home via Addis Ababa.

## Day 13

**Thursday 20th November**

### Return home

We arrived back in London early in the morning.

Abyssinian Owl
