Tour participants: Andrew Bray & Richard Lansdown (leaders) with 11 Naturetrek clients

Day 1

Sunday 30th April

After a flight from London Gatwick we arrived at Bastia airport, where Tongue Orchids were outside the entrance. Arranging the vehicles took a little longer than expected, but once sorted we were on our way, heading to Ponte Leccia. Here we had a coffee stop and Andrew bought some cheese, meat and bread. We then headed across the top of the island to l'Île-Rousse, where we stopped at the farmer's market to buy fruit and salad. We then pushed on to our lunch stop near Galeria. Here we saw a variety of birds, wall lizards and some endemic plants: Corsican Storksbill (*Erodium corsicum*) and Sea Lavender (*Limonium corsicum*).

We then drove a few hundred yards to see if there was a way down to some wetland, but unfortunately there was not. We did hear Cetti's Warbler and saw a pair of Long-tailed Tits. Our next stop was on the coastal road at one of the U bends at the head of one of the many valleys we had to negotiate. Here were even more endemic plants, though we stopped for the Wild Vine (*Vitis riparia*) and saw the Illyrian Sea Lily (*Pancreatium Illyricum*). We also saw Coal Tit and Sardinian Warbler. We stopped again for photographs near a graveyard where the views of La Calanche were stunning. We found a boulangerie (bakers) in Porto that served proper ice cream.

We then headed inland to Evisa and our hotel; Atoine. At night we dined on salad, trout with rice and apple tart.

Day 2

Monday 1st May

It was dry until just before 9am, which was the time we had set to start a walk down the road to the graveyard. It then rained for three hours! We divided the food for lunch between us and then started the descent down the Spelunca Gorge. The path descended steeply through mature maquis under a canopy of Tree Heather (*Erica arborea*) and Strawberry Tree (*Arbutus unedo*), where the differences between Corsican Pine (*Pinus nigra* subsp. *Laricio*) and Maritime Pine (*Pinus pinaster*) were shown. Botanical highlights included *Cyclamen repandum*, the delicate endemic Snowflake (*Acis longifolia*) and the curious flowers of Tyrrhenian Birthwort (*Aristolochia tyrrhena*). Progress was slow as it was very wet with constant rain. We saw the endemic Corsican Fire Salamander before it hid itself in the vegetation. We also saw lots of strange plants such as Jersey Toadflax (*Linaria pelisseriana*), and endemic plants including False Daisy (*Bellium bellidioides*). We all had good views of a Firecrest with its red crest. As we neared the bottom it stopped raining and the sun came out.

Lunch was taken at the Zaglia Bridge in the sun. Everyone had something to dry! There were stands of Royal Fern (*Osmunda regalis*) by the river bridge. After lunch we walked to the road bridge and everyone saw Dipper whilst scores of Crag Martins and House Martins were flying about.

Some of us then drove to Ota for a coffee whilst others walked to the Ponte a Pianella before being ferried to the cafe. Half an hour later the first minibus trip departed for Evisa. On the road were pigs and dogs, whilst on the second trip there were cows. We had to go round them as they stood their ground in the road; some were lying down! The first group was dropped off at the graveyard to look for birds. We heard Wryneck and saw Pied and Spotted Flycatchers, Whinchat and Redstart. A text was sent so the second group could look for them as well; they were not disappointed.

We met later at 7.15pm to do the checklist. We managed to do the bird list and other fauna before a dinner of soup, boar with polenta (maize) and chestnut pudding. The plants had to wait!

Day 3

Tuesday 2nd May

We started with an early morning bird walk where we saw our first Treecreeper of the day. There were plenty of tits, and a Great Spotted Woodpecker put on a show. There were not many Cirl Buntings, but we made up for that a bit later.

The first stop today was in the Aitone Forest where we walked along a track. We saw Firecrest and Corsican Mint (*Mentha requinii*). At the rock plateau we had good views of the fat green Bedriaga Lizard as well as Corsican Finch and a very large flock of Corsican Crossbills. The rocks were full of pools from the rain and some held species such as the endemic Short-leaved Stonecrop (*Sedum brevifolium*), as well as some aquatics.

We then headed to Col de Savi where we looked for warblers, but found Raven, Corsican Finch and Cirl Bunting. There was also the endemic *Thymus herba-barona* with a lovely lemon scent. As it was a bit cool and breezy, we headed down the hill and found another lunch spot off the road. On arrival we disturbed two Red-legged Partridges.

Following lunch, we drove down to the coast and stopped just before the bridge over the River Liamone. Here we saw a couple of Little Ringed Plovers plus a host of other birds and plants. We then drove over the bridge and parked in the cafe car park near the beach. Whilst we had coffee, one member went for a swim in the river and another paddled their feet: it was a bit chilly! We found various endemic plants, though the Jersey Orchid (*Anacamptis laxiflora*) had already turned. We saw Tawny Pipit, Sardinian Warbler, Peregrine, Shag and Sanderling. A lone Golden Plover flew over and Bee-eaters settled in a dead tree, ready for the telescopes. On the way back we stopped at the Sagone rubbish tip where there were lots of Ravens and Red Kites.

After another wonderful day we dined on dried meats, then Corsican omelette with vegetables, followed by fresh fruit salad.

Day 4

Wednesday 3rd May

We departed in the sun, but it was not to last. At Col de Vergio we had superb views of Woodlark and Corsican Finch. There were lots of endemic plants amongst the flat Juniper close to the ground including the Corsican Crocus (*Crocus corsicus*). Two Golden Eagles flew overhead, and on the other side of the valley, four female Mouflon grazed.

The cloud started to roll in, but on our way down the mountain the sun started shining again. We stopped as the forest was ending for a comfort break and shed some of our clothing. The pigs and cows beat a retreat in disgust! We looked for butterflies and moths, and had good views of Queen of Spain Fritillary.

Our next stop was in the Santa Regina Gorge with the endemic *Saxifraga Corsica*, Blue Rock Thrush, Crag Martin and a Golden Eagle. A Dipper flew over the bridge rather than under! It was a great place to have lunch, though the cloud started to cover the sky.

Our next stop was in the maquis near Francardo, with Corsican Milkwort (*Polygala nicaensis* subsp. *Corsica*). More plants were added to the list including Green-winged Orchid (*Anacamptis morio*), Pink Butterfly Orchid (*Anacamptis papilionacea* subsp. *Papilionacea*), Early Spider Orchid (*Ophrys incubacea*) and Provence Orchid (*Orchis provincialis*). A Marmora's Warbler flew by the side of the road.

Not long after starting the next leg, it started to rain. We therefore drove direct to our next hotel, and after some juggling, everybody had a bed to sleep in! In the evening we drove up to see a Corsican Nuthatch nest before returning to the hotel. Later we dined on boar with pasta, and lemon meringue pie.

Day 5

Thursday 4th May

We had an early morning bird walk and saw Dipper, Grey Wagtail, Coal Tit, Raven and several other birds, though the noise of the river made it difficult to hear the birds. At breakfast we discovered the road ahead was closed due to a rock fall and would not be cleared this week. This meant a change of plan for Days 6 and 7.

Today was to plan and we set off for the Verghello Valley and stopped at Eiffel Bridge. We watched the local two-carriage train cross the bridge, heading north. We walked a short way and then the vehicles picked us up and we drove a little further. Moltoni's Warbler sung and there were brief glimpses as it skulked in the bushes. There were good views of Spotted Flycatcher and Great Spotted Woodpecker.

Next stop was by a bridge by wetland where we found a Hemp-agrimony (*Eupatorium cannabinum* subsp. *Corsicum*) and Long-lipped Tongue-orchid (*Serapias vomeracea*). We then drove to another bridge and walked down the road by running water with Tongue-orchid (*Serapias lingua*) and Wedge-lipped Orchid (*Dactylorhiza saccifera*). There was also the rare Creeping Marshwort (*Apium repens*). We finally drove to a helicopter landing site at the end of the metalled road for lunch with panoramic views.

After lunch we headed for the Beech forest at Col de Vizzavona at 1,163 metres. Here we explored the grassland with the endemic Columbine (*Aquilegia dumeticola*) before entering the wood. The ancient ruin of the hill fort dominated the pass. We then went to the cafe at Vizzavona Railway Station where a train pulled in as part of its scheduled stop.

It started to rain as we left and once again we arrived at the hotel in the rain. We dined on seafood salad, half a chicken with vegetables, and finished with floating islands.

Day 6

Friday 5th May

First thing today was to look again at the Corsican Nuthatches, where we spent about half a hour watching them feed their chicks. We then drove through Corte to Aléria, where we visited LeClerc supermarket to do some shopping. The only birds of note were Red Kite and Common Buzzard. We then drove to Aléria beach at Plage de Padulone. There was a Marsh Harrier flying behind the beach restaurant. We had a mid morning drink sitting in comfy chairs with not a bird to be seen over the sea except one Yellow-legged Gull.

We then drove to Étang d'Urbino where we stopped by a path that lead down to a saline marsh area. There were Great Egret and Greater Flamingo, as well as lots of singing Corn Buntings and two Zitting Cisticolas

showed their prowess at singing while flying. Lunch was taken at the Conservatoire du Littoral station where we met the warden who was very helpful. There are no issues about us eating there in the future either. One of the group went for a swim in the cool waters of the Étang.

After lunch we checked out a local hill and found *Cytinus ruber*, as well as a low-lying wet area with Divided Sedge (*Carex divisa*), a common plant in the Mediterranean but rare in the UK. On the way back along the road we stopped for a Woodchat Shrike, which tied closely with the Bee-eaters for 'bird of the day'.

Our next stop was at the Roman ruins at Aleria. As we entered the gate we saw Golden Orioles fly from trees in different directions. Our final stop was near the gorge where an old Genoese road bridge had been replaced. Here we found the endemic sedge *Juncus requienii*. More freshwater plants were found but there was not time to stay too long.

Once back at the hotel the leaders went shopping, and only just got back in time for the log call! That night we dined on Corsican soup, trout and a frozen pudding.

Day 7

Saturday 6th May

Who knew what the weather would do: certainly not the forecasters nor the locals. We started up the Tavignano Valley and reached the burnt area which was colonised by Aspidillas. We put on our raincoats and trousers as there were a few spots of rain. A bit later we turned back as the rain started to fall. It was a wise move, and the remainder of the morning was spent in Corte.

Lunch was taken on the equivalent of a 'B' road near a river, with two Nightingales singing. There were a few plant species about as well with the mint *Mentha suaveolens subsp. insularis*. After lunch we drove up through Tralonca to the graveyard to see Lady Orchid (*Orchis purpurea*). It was then back through the village and we parked up to explore the bank with a range of orchids including Man Orchid (*Orchis anthropophora*) and Dense-Flowered Orchid (*Neotinea maculate*) to name a few, and a broomrape *Orobanche amethystea*. As the minibus continued down the hill two Jays flew across, and as we suddenly came to a stop, a Hoopoe flew off. We all eventually had great views as it sat on a post. It had been raining off and on all afternoon, and so it continued when we drove back to the hotel.

Our last night banquet included omelette for starter, wild boar and pasta for main, and a raspberry tart for pudding. The party was just beginning as the myrtle drink came out!

Day 8

Sunday 7th May

We left our hotel in the early morning sun and headed to the airport. We had a stop at a model village of a Corsican mountain town an artist had made. We said our first farewell at the airport but there were more to follow. We boarded our flight back to the UK, where another Naturetrek adventure came to an end.

<i>Lavendula stoechas</i>	<i>Limodorum abortivum</i>	<i>Lupinus angustifolius</i>
<i>Parentucellia viscosa</i>	<i>Polygala vulgaris</i>	<i>Poterium sanguisorba</i> subsp. <i>balearica</i>
<i>Poterium verrucosum</i>	<i>Pulicaria odora</i>	<i>Quercus petraea</i>
<i>Spartium junceum</i>	<i>Trifolium arvense</i>	<i>Trigonella elegans</i>
<i>Vulpia myuros</i>		

Flush and stream up the valley

<i>Apium repens</i>	<i>Athyrium distentifolium</i>	<i>Athyrium felix-femina</i>
<i>Carex demissa</i>	<i>Carex echinata</i>	<i>Carex frigida</i>
<i>Carex lepidocarpa</i>	<i>Carex leporina</i>	<i>Carex microcarpa</i>
<i>Carex pallescens</i>	<i>Carex remota</i>	<i>Dactylorhiza saccifera</i>
<i>Eupatorium cannabinum</i> subsp. <i>corsicum</i>	<i>Hypericum corsicum</i>	<i>Luzula multiflora</i> var. <i>multiflora</i>
<i>Osmunda regalis</i>	<i>Salix cinerea</i> subsp. <i>cinerea</i>	<i>Sanicula europaea</i>
<i>Serapias vomeracea</i>		

Helicopter landing for Lunch

<i>Cardamine flexuosa</i>	<i>Carex leporina</i>	<i>Cirsium vulgare</i>
<i>Conopodium majus</i>	<i>Juncus bufonius</i>	<i>Juncus effusus</i>
<i>Juncus inflexus</i>	<i>Luzula campestre</i>	<i>Luzula forsteri</i>
<i>Luzula pedemontana</i>	<i>Moenchia erecta</i>	<i>Montia fontana</i> subsp. <i>chondrosperma</i>
<i>Myosotis ramosissima</i>	<i>Myosotis stricta</i>	<i>Origanum vulgare</i>
<i>Parentucellia latifolia</i>	<i>Phytolacca americana</i>	<i>Rumex obtusifolius</i>
<i>Sagina subulata</i> subsp. <i>revellieri</i>	<i>Teesdalia nudicalis</i>	<i>Trifolium micranthum</i>
<i>Umbilicus horizontalis</i>	<u><i>Urtica atrovirens</i></u>	<i>Veronica officinalis</i>
<i>Veronica persica</i>	<i>Vicia sativa</i> var. <i>sativa</i>	<i>Viola arvensis</i>
<i>Viola kitaibeliana</i>		

Col de Vizzavon

<i>Achillea millefolium</i>	<i>Aesculus hippocastanum</i>	<i>Alliaria petiolata</i>
<i>Allium ursinum</i>	<i>Aquilegia dumeticola</i>	<i>Arctium minus</i>
<i>Carex caryophylla</i>	<i>Carex pilulifera</i>	<i>Corydalis pumila</i>
<i>Dryopteris affinis</i>	<i>Fagus sylvatica</i>	<i>Fragaria vesca</i>
<i>Galium odoratum</i>	<i>Galium rotundifolium</i>	<i>Geum urbanum</i>
<i>Ilex aquifolium</i>	<i>Juncus effusus</i>	<i>Luzula campestris</i>
<i>Luzula pedemontana</i>	<i>Luzula sylvatica</i> subsp. <i>sieberi</i>	<i>Moehringia pentandra</i>
<i>Potentilla micrantha</i>	<i>Ranunculus macrophylla</i>	<i>Ranunculus platanifolius</i>
<i>Rumex acetosa</i>	<i>Sagina procumbens</i>	<i>Sambucus edulis</i>
<i>Selaginella kraussiana</i>	<i>Stellaria media</i>	<i>Trifolium micranthum</i>
<i>Urtica dioica</i>	<i>Veronica hederifolia</i>	<i>Veronica montana</i>
<i>Veronica repens</i>	<i>Veronica serpyllifolia</i>	<i>Viola reichenbachiana</i>
<i>Viola riviniana</i>		

5th May

Plage de Padulone

<i>Allium oleraceum</i>	<i>Asparagus officinalis</i>	<i>Equisetum ramosissimum</i>
<i>Lonicera etrusca</i>	<i>Matthiola sinuata</i>	<i>Foeniculum vulgare</i> subsp. <i>vulgare</i>
<i>Salix alba</i>	<i>Salix purpurea</i>	

Etang d'Urbino

<i>Allium roseum</i>	<i>Anagallis arvensis</i>	<i>Aster tripolium</i>
<i>Blackstonia perfoliata</i>	<i>Bolboschoenus maritimus</i>	<i>Carex distans</i>
<i>Cichorium intybus</i>	<i>Cistus laurifolius</i> subsp. <i>atlanticus</i>	<i>Equisetum telmateia</i>
<i>Gladiolus italicus</i>	<i>Halimione portulacoides</i>	<i>Hordeum marinum</i>
<i>Inula crithmoides</i>	<i>Juncus acutus</i>	<i>Juncus maritimus</i>
<i>Lathyrus annuus</i>	<i>Lathyrus aphaca</i>	<i>Lathyrus bythinicus</i>
<i>Lathyrus clymenum</i>	<i>Lathyrus hirsutus</i>	<i>Lathyrus odoratus</i>
<i>Mentha suaveolens</i> subsp. <i>insularis</i>	<i>Oenanthe lachenalii</i>	<i>Phragmites australis</i>
<i>Polygonum aviculare</i>	<i>Polypogon monspeliensis</i>	<i>Potentilla verna</i>
<i>Salsola kali</i>	<i>Salsola fruticosa</i>	<i>Typha domingensis</i>
<i>Vicia sativa</i>		

Lunch at the Conservatoire du Littoral

<i>Alopecurus pratensis</i>	<i>Bartsia trixago</i>	<i>Beta vulgaris</i> subsp. <i>maritima</i>
<i>Bolboschoenus maritimus</i>	<i>Calystegia sepium</i>	<i>Calystegia soldanella</i>
<i>Carex divisa</i>	<i>Centaurium maritimum</i>	<i>Chenopodium album</i>
<i>Cytinus ruber</i>	<i>Halimione portulacoides</i>	<i>Hordeum marinum</i>
<i>Hordeum secalinum</i>	<i>Juncus acutus</i>	<i>Juncus maritimus</i>
<i>Lamium purpureum</i>	<i>Lolium perenne</i>	<i>Malva neglecta</i>
<i>Parapholis incurva</i>	<i>Phalaris aquatica</i>	<i>Phragmites australis</i>

Polypogon monspeliensis
Serapias parviflora
Spergula rubra
Zostera noltei

Rhinanthus minor
Sonchus oleraceus
Tamarix gallica

Rumex crispus
Spergula marina
Trisetum flavescens

Roman ruins at Aleria

Allium neapolitanum
Eryngium campestre

Campanula rapunculus
Marrubium vulgare

Convolvulus althaeoides
Scrophularia canina subsp. pinnatifida

Tavignano River

Adiantum capillus-veneris
Carex frigida
Carex panicea
Epilobium hirsutum
Hypericum corsicum
Juncus requienii
Nasturtium officinale
Ranunculus parviflorus

Apium nodiflorum
Carex lepidocarpa
Cyperus longus
Equisetum ramosissimum
Juncus articulatus
Mentha aquatica
Osmunda regalis
Schoenus nigricans

Carex distans
Carex microcarpa
Erica scoparia
Holoschoenus vulgaris
Juncus bufonius
Mentha x piperita
Plantago major
Typha angustifolia

6th May

Tavignano Valley

Aegilops geniculata
Cheilanthes acrosticha
Clinopodium calamintha
Cuscuta planiflora
Euphorbia cupanii
Euphorbia pithyusa subsp. cupanii
Galium verum

Lamarckia aurea
Medicago orbicularis
Phillyrea latifolia
Pulicaria odora
Ruta chalapensis
Sedum rubens
Trifolium resupinatum

Anthyllis vulneraria subsp. vulneraria
Cheilanthes guanchica
Convolvulus althaeoides

Mammals (‡ = introduced)

Mouflon ‡, *Ovis orientalis*

Wild Boar ‡, *Sus scrofa*

Reptiles

Bedriaga's Rock Lizard •, *Archaeolacerta bedriagae*

Tyrrhenian Wall Lizard •, *Podarcis tiliguerta*

Italian Wall Lizard, *Podarcis sicula*

Amphibians

Corsican Fire Salamander •, *Salamandra corsica*

Italian Pool Frog ‡, *Rana bergeri*

Butterflies

Mallow Skipper, *Carcharodus alceae*

Swallowtail, *Papilio machaon*

Scarce Swallowtail, *Iphiclides podalirius*

Brimstone, *Gonepteryx rhamni*

Clouded Yellow, *Colias crocea*

Large White, *Pieris brassicae*

Green-veined White, *Pieris napi*

Small White, *Pieris rapae*

Wood White, *Leptidea sinapis*

Small Copper, *Lycaena phlaeus*

Brown Argus, *Aricia agestis*

Holly Blue, *Celastrina argiolus*

Green-underside Blue, *Glaucopsyche alexis*

Common Blue, *Polyommatus icarus*

Painted Lady, *Vanessa cardui*

Red Admiral, *Vanessa atalanta*

Peacock, *Inachis io*

Queen of Spain Fritillary, *Issoria lathonia*

Southern Speckled Wood, *Pararge aegeria aegeria*

Corsican Wall Brown •, *Lasiommata paramegaera*

Meadow Brown, *Maniola jurtina*

Small Heath, *Coenonympha pamphilus*

Dragonflies

Scarlet Darter , *Crocothemis erythraea*

Other Insects

Blue-winged Grasshopper, *Oedipoda caerulescens*

Fire Bug, *Pyrrhocoris apterus*

Carpenter Bee, *Xylocopa violacea*

Dung Beetle, *Scarabaeus laticollis*

Rose Chafer, *Cetonia aurata*

Egyptian Grasshopper, *Anacridium aegyptium*

Hornet, *Vespa crabro*

Larder Beetle, *Oedomera nobilis*

Click Beetle, *Dilus flavescens*

Pond Skater, *Gerris lacustris*

Moths

Common name	Scientific name	Notes
	Sesiidae	
Fiery Clearwing	<i>Pyropteron chrysidiformis</i>	Endangered in UK
	Plutellidae	
Diamond-back Moth	<i>Plutella xylostella</i>	Abundant immigrant to UK
	Oecophoridae	
	<i>Denisia ragonotella</i>	Little information available; possibly endemic
	Gelechiidae	
	<i>Nothris verbascella</i>	Extinct in UK
	<i>Pseudosophronia exustellus</i>	Not found in UK
	Tortricidae	
	<i>Hedya nubiferana</i>	Common in UK
	<i>Epinotia cynosbatella</i>	Common in UK
	Pterophoridae	
	<i>Merrifieldia semidactylus</i>	Endemic to Corsica & Sardinia
Rusty Dot Pearl	<i>Udea ferrugalis</i>	Common immigrant to UK
	<i>Achyra nudalis</i>	Widespread in Mediterranean; not found in UK
Rush Veneer	<i>Nomophila noctuella</i>	Common immigrant to UK
	Pyralidae	
Bee moth	<i>Aphromia sociella</i>	Widespread in Mediterranean; not found in UK
	<i>Acrobasis obliqua</i>	Widespread in Mediterranean; not found in UK
	<i>Homoeosoma sinuella</i>	Common in UK
	Geometridae: Sterrhinae	
Portland Ribbon Wave	<i>Idaea degeneraria</i>	Portland is the traditional locality in UK
Lustrous Least Carpet	<i>Idaea filicata</i>	Widespread in Mediterranean; not found in UK
Small Dusty Wave	<i>Idaea seriata</i>)	Widespread, often sitting on sides of buildings (common in UK)
Satin Wave	<i>Idaea subsericeata</i>	Widespread in UK
Small Blood-vein	<i>Scopula imitaria</i>	Common in UK
Tawny Wave	<i>Scopula rubiginaria</i>	Very local in UK
Vestal	<i>Rhodometra sacraria</i>)	Regular immigrant to UK
	Geometridae:Larentiinae	
Gem	<i>Orthonama obstipata</i>	Regular immigrant to UK
Garden Carpet	<i>Xanthorhoe fluctuata</i>	Common in UK
	<i>Coenotephria ablutaria</i>	Widespread in Mediterranean; not found in UK
Ochreous Pug	<i>Eupithecia indigata</i>	Widespread in UK
Masked Pug	<i>Eupithecia oxycedrata</i>	Widespread in Mediterranean; not found in UK
Strawberry Tree Pug	<i>Eupithecia unedonata</i>	Widespread in Mediterranean; not found in UK
Netted Pug	<i>Eupithecia venosata</i>	Widespread in UK

Common name	Scientific name	Notes
	Geometridae:Ennomiinae	
	<i>Isturgia assimilaria</i>	Endemic to Corsica & Sardinia
Willow Beauty	<i>Peribatodes rhomboidaria</i>	Common in UK
	<i>Euchrognophos mucidaria</i>	Widespread in Mediterranean; not found in UK
Yellow Belle	<i>Aspitates ochrearia</i>	Widespread in UK, especially on coasts
	<i>Euchrognophos mucidaria</i>	Widespread in Mediterranean; not found in UK
	Sphingidae	
Humming-bird Hawk-moth	<i>Macroglossum stellatarum</i>	Regular immigrant to UK
	Notodontidae	
Pine Processionary	<i>Thaumetopoea pityocampa</i>	Larval webs widespread (2 records for UK)
	Erebidae:Arctiinae	
Hoary Footman	<i>Eilema caniola</i>	Formerly confined to SW coasts in UK, but now spreading
	Erebidae:Boletobiinae	
Small Marbled	<i>Eublemma parva</i>	Scarce immigrant to UK
	Noctuidae:Acontiinae	
Pale Shoulder	<i>Acontia lucida</i>	Very rare immigrant to UK
	Noctuidae:Aediinae	
Four-spotted	<i>Tyta luctuosa</i>	Very local in UK
Sorcerer	<i>Aedia leucomelas</i>	Very rare immigrant to UK
	Noctuidae:Noctuinae	
Turnip Moth	<i>Agrotis segetum</i>	Common in UK
	Noctuidae:Hadeninae	
	<i>Hadena sancta</i>	Widespread in Mediterranean; not found in UK
	<i>Perigrapha rorida</i>	Widespread in Mediterranean; not found in UK
Delicate	<i>Mythimna vitellina</i>	Common in UK
	Noctuidae:Xyleninae	
Dotted Chestnut	<i>Conistra rubiginea</i>	Local in UK, but increasing
Pale Mottled Willow	<i>Caradrina clavipalpis</i>	Common in UK
	<i>Paradrina noctivaga</i>	Widespread in Mediterranean; not found in UK
	Noctuidae:Plusiinae	
Silver Y	<i>Autographa gamma</i>	Common immigrant to UK
	Nolidae	
	<i>Nola squalida</i>	Widespread in Mediterranean; not found in UK
