Tour participants: Yusuf Rizvi (Tour leader) with six Naturetrek clients on pre-tour extension and the main tour.

## Pre-extension Day 1

Wednesday 12th March

In flight from the UK to India.

## Pre-extension Day 2

Thursday 13th March

The flight from the UK landed at Nagpur in the early morning and the group were met by Yusuf and were met the guests and were transferred to the Radisson Blu hotel in Nagpur. Yusuf briefed the guests about the day's programme and then everyone retired for a few hours' sleep before we met again at 9:45 am and started our journey to Tadoba. We reached Tadoba in two and a half hours. After a quick lunch and check in we started our first safari. Everyone was of course excited to be on the safari, anticipating some great sightings. We were in two different jeeps. We saw some good birds and also we were lucky to see our first Tiger at the Panderpauni water hole. In the evening we all met in the common area to do the checklist followed by dinner.

## Pre-extension Day 3

Friday 14th March

We awoke to a pleasant morning and we all met in the guest area for some hot drinks, before leaving for the game drive. The morning is usually the best time for finding birds and we saw some interesting species like Lesser Whistling Ducks, various egrets, Oriental Darter, Asian Open-billed Stork and Grey Jungle Fowl to name just a few. We saw some signs of the mighty Tiger, but had no luck with sightings.

The afternoon was also very quiet with just a few warning calls of Spotted Deer but no predator sightings. In the evening we all met to go through the checklist followed by dinner.

## Pre-extension Day 4

Saturday 15th March

After refreshing tea and coffee, we went for our morning safari on which we found quite a few birds. After exploring for potential Tiger territories we went to the breakfast point. Post breakfast we got the news that two Tigers had been sighted near Jamuni village, so we quickly drove there and soon saw a Tigress walking in the meadow. Of course, everyone was excited to see our second Tiger of the trip.

After lunch we again went for safari, which was very quiet initially. We decided to check the area where the Tigress had been earlier in the morning and on the way we saw Mottled Wood Qwls with chicks. Later we reached the Jamuni Lake area where we saw a few birds like Black-headed Ibis, Red-naped Ibis, Bronze-winged Jacana etc to name just a few. As soon as we reached the lake area we heard some more alarm calls a short distance away. We reached the spot and saw some Spotted Deer who were alert, but by that time the Tigress had already disappeared into the thickets. Back at the lodge we did the checklist and later had dinner.

We also got the news that due to Covid 19 all the parks in Maharashtra would be closed from the next day and due to the pandemic we were not sure if the tour could continue or not!

## Main Tour Day 1

**Sunday 16th March**

Today we had an early breakfast and started our journey to Pench. Everyone was happy to know that we were continuing with the tour as the restrictions were in Maharashtra state but Pench was still open. It took us about four hours to reach Pench.

Meanwhile the rest of the group who were supposed to join us for the main tour were not able to come due to Covid 19, the Indian Government having suspended all visas and no incoming flights from other countries were being allowed.

Post lunch we all met to explore Pench. We found a large congregation of Spotted Deer and saw a few interesting birds like Lesser Golden-backed Woodpeckers and while exploring we got the news that some people had seen a pack of Wild Dogs (also known as Dhoolas). We decided to check that area and soon we were in luck, and saw the pack at the edge of the forest.

Back in the lodge we did the checklist followed by dinner.

## Day 2

**Monday 17th March**

Today we had our second drive in Pench. The morning was quite pleasant and today our plan was to lookout for the Tigress with three sub-adults, the famous female known as Collar Wali, as she was the first to be fitted with a radio collar. With positive vibes all around us we drove straight to the area where we anticipated that she might be and on the way we saw some Jackals. While all of us were busy taking photographs of the Jackals, Yusuf heard a langur distress call and as we reached the spot we saw the Tigress cross the road and then she started calling for the sub-adults before she vanished in the thickets. She kept on calling and after a while we heard another growl from the other side of the track but a long way away, which must have been another Tiger. We waited for about 20 minutes before we saw Collar Wali returning back with the sub-adults - a real treat for us. The sub-adults were all males, and seeing them walking around with such confidence made us feel sure that they will be as bold as their mother.

Later the group with Yusuf saw a different Tiger as they went to another area and after following a few distress calls they saw the Tiger which could have been a transient male. This young Tiger was quite shy and disappeared almost as soon as he was sighted. Later in the afternoon drive was a little quiet initially as there were hardly any distress calls or tracks and signs, but towards the end of the drive we heard a few calls and we saw a Tiger in the thick Lantana bushes, although he was only partially visible.

In the evening we all met to do the checklist, had dinner together and talked over the plans for the following day.

## Day 3

## Tuesday 18th March

Today was our last drive in Pench Tiger reserve, and we set out with high hopes. We saw some interesting birds including Gadwall, Spot-billed Ducks, Northern Shoveler, Asian Open-billed Stork to name just a few, and later we got the news that some people had seen a young Tiger crossing the road. We drove quickly and reached the spot and saw there were already quite a few people waiting in their jeeps. Soon the young male appeared and he crossed the road. Anticipating his movement we decided to intercept him on another route, and soon after we reached the spot we heard a few distress calls and saw a Leopard sitting on the ground in the undergrowth. While we were watching the Leopard we heard more distress calls and with that the young Tiger crossed the road behind us!

We were all lucky to see two different big cats from one vantage point!

Back at the lodge we had enough time to clean up and change and after lunch we started our journey to Kanha, and it was interesting to see the countryside of central India. We reached Kanha in the evening, and were greeted by the hospitable staff of Kanha Jungle Lodge. After some evening high tea, we all waited eagerly to see the resident Flying Squirrel in action!

We later met for the checklist followed by dinner, before calling it a night

## Day 4

## Wednesday 19th March

Today was our first drive in Kanha National Park. It was quite a pleasant morning and we saw quite a few birds, including Lesser Golden-back Woodpecker, Gadwall, White-rumped Vulture, Crested Serpent Eagle and Little Grebe amongst others. We heard a few distress calls of Spotted Deer and Sambar at Baba Thega Water hole side, but nothing appeared, so we decided to check other areas. As we reached the district boundary line we saw a few vehicles already lined up and we were told that they saw a glimpse of a Tigress in the undergrowth and then she came out and went back in. We all waited eagerly and suddenly we saw a Sambar giving distress calls before he ran off in the opposite direction. After a few minutes we saw the Tigress up the hill and then she crossed the fire break line. Later, on the way back, we saw a stand-off between two male Swamp Deer. The stand-off turned more serious and both started fighting in the small lake.

In the afternoon we decided to remain in and around the area where we heard the distress calls in the morning. While scanning that area, we came across a herd of Spotted Deer which seemed to be alarmed by something. The park guide said they might have seen a Jackal but Yusuf decided to stay a little longer and observe them and soon the deer started giving a few distress calls. A little later we heard a Tiger growl, so we followed the call and then came back to the junction where we saw the Tigress coming out with her three sub-adult cubs - a magical moment. The family came and sat down in the middle of the junction, and then the inquisitive youngsters came a little closer to look at us. The sub-adults were all males, just like the family of the Tigress in Pench. One more vehicle came to the spot, but the family was so confident that they started playing with each other while the mother was watching them. Later some more people came to the spot including our other group members. It was an excellent sighting to see them up-close and to observe their behaviour, and this sighting was the highlight of the trip.

On the way back we got the sad news that they were closing all the parks in Madhya Pradesh and India was going into lockdown from 22nd March. Back at the lodge we were informed by the Delhi office that we should change the flight tickets. We got all the tickets changed and Yusuf asked the lodge manager to get a print out and later it was given to everyone. After dinner we all called it a night.

## Day 5

**Thursday 20th March**

It was a lie-in this morning and then we all met at 8:30 am for a hot breakfast followed by a walk to the river side and then we had a cookery demonstration which we all enjoyed, followed by lunch. We checked out around 2pm from Kanha Jungle Lodge and set off for Nagpur.

We reached Nagpur around 8pm and the group went to clean up and change and then we all met again for our farewell dinner. After dinner we all met again at 11:15pm to head for the airport where we all said goodbye to Yusuf, and another tour ended with a lot of fond memories and excitement, even though it had been cut short by the Coronavirus pandemic.

## Day 6

**Friday 21st March**

The group boarded their flight back to the UK where everyone arrived safely.
