Day 1

Sunday 1st July

We arrive in an overcast Lyon and leave as soon we have met up with the whole group and collected our hire vehicles. We initially take the toll road east for speed, heading for Chambery, with the dramatic rocky outcrops of Mont du Chat and Mont Rivard as a backdrop. We see Buzzard and Black Kite overhead. At Albertville we head southeast, to Moutiers, then northeast, crossing into Italy via Col de Petit St-Bernard. Just before entering Italy we have a short stop to stretch our legs and to have a brief look at the roadside flora. Despite the roadsides having been cut there are many stands of Large and Small Yellow Foxgloves (*Digitalis ambigua*, *D. lutea*), also Rock Soapwort, Alpine Gypsophila and *Aruncus dioica*. We have tantalising glimpses of many other plants also. The Elder-flowered Orchids (*Dactylorbiza sambucina*) are past their best, but we see Fragrant Orchids (*Gymnadenia conopsea*), Alpine Thistle (*Carduus defloratus*), masses of Alpenrose (*Rhodedendron ferrugineum*), Clustered and Bearded Bellflower and Harebell (*Campanula glomerata*, *C. barbata*, *C. rotundifolia*).

We stop above La Thuile for coffee and hot chocolate, taking a brief look at the lush bank nearby, where we find among other things, Bistort, Great Marsh Thistle (*Carduus personata*), *Allium sphaerocephalon*, Viper's Bugloss, Scorzonera-leaved Rampion and Field Gentian (*Gentianella campestris*). As we descend into the Aosta Valley the wooded roadsides are full of Adenostyles (*A. alliariae*), Aconite-leaved Buttercup and Spiked Rampion (*Phyteuma spicatum*).

We arrive in Cogne to a warm welcome at our family run hotel. Dinner is superb, with a wonderful choice of dishes, accompanied by local wine.

Day 2

Monday 2nd July

It is raining first thing so the early morning walk is abandoned. After breakfast, our first bird of the day is a Grey Heron flying up towards Cogne where we stop for picnic supplies; some people finding the park information centre and free maps. Cogne is an attractive little town where any development is kept very much in keeping with traditional architecture. It is a popular base for excursions into the Gran Paradiso National Park and famous for Drum Pillow Lace (al tombolo) which can be seen being made in the town.

After watching a male Whinchat in the meadow by the car park we head south from Cogne following the Torrent Valnontey to the pretty little village of the same name. Our first stop by the river finds us Aquilegia

viscosa, Spiked Bellflower and Fairy's Thimble (Campanula spicatum, C. cochlearifolia). We then park in the village, don our waterproofs and pack up the picnic. We are walking along the river towards the head of the valley and the impressive glaciers of the Gran Paradiso. It is mostly a level walk with a variety of wooded and open habitat, with much Green Alder along the edges of the river. Wayside flowers include Cow-wheat (Melampyrum pratense), Wood Buttercup (Ranunculus nemorosus), Yellow Wood Violet, Red Campion, Buckler Mustard (Biscutella laevigata), Alpenrose, Alpine Rose (R. alpina), masses of Wood Cranesbill, (Geranium sylvaticum), Lesser Masterwort (Astrantia minor) and Snowy Wood Rush (Luzula nivea). We also find Antennaria dioica, Arnica montana, Crepis aurea, Acinos alpinus, Alpine Scullcap (Scutellaria alpina), Yellow Woundwort (Stachys recta), Mountain Clover (T. montanum), Pyrola minor, Grass of Parnassus, Martagon Lily, May Lily (Mianthemum bifolium) and White False Helleborine (Veratrum album) There is also some saxifrages along the way including Saxafraga aizoides, S. aspera, S. paniculata, S. exarata and S. stellaris.

Two chamois are disturbed, which run quite close to us before bounding up the valley side and there are singing Garden Warblers and a family of Lesser Whitethroats.

We picnic in the almost deserted hamlet of Valmiana, sheltering by one of the houses as it is threatening to rain, using the log pile as our table. In a damp meadow close to the river we find many Broad-leaved and Alpine Broad-leaved Marsh Orchids and their hybrids, *Nigritella rhellicani*, a mass of Tofields Asphodel (*Tofieldia calyculata*), Mountain Willow-herb, Globeflower (*Troillius europea*) and Water Avens (*Geum rivale*). Beside the river are Grey and White Wagtails and in the riverine woodlands: Chiffchaff, Robin, Wren and Long-tailed Tits.

We turn round mid-afternoon to allow us some time in the Alpine Garden at Valnontey. This intriguing little garden was set up in 1955 and includes a research station. It gives us the opportunity to see what plants are possible in the area, including the handsome vetch *Astragalus centralpina* (*A. alopecurus*).

We return to our hotel in anticipation of another excellent dinner, and the difficult task of making choices!

Day 3

Tuesday 3rd July

Early risers take the chance to wander down to the little village of Cretaz, where the Torrent Grand Evvia is joined by the Torrent Valnontey, to look for Dipper in the river. The meadows alongside the river are lush with flower rich vegetation including Bistort (*Polygonum bistorta*), various buttercups, Alpine Lovage (*Ligusticum mutellina*), Masterwort (*Peucedanum ostruthium*), Broad-leaved Sermountain (*Laserptium latifolium*), Hoary Plantain (*Plantago media*), Globe-headed Rampion (*Phyteuma hemisphaericum*), Vipers Bugloss, Rosebay Willowherb, Alpine Calamint (Acinos alpinus), Bladder Campion, Nottingham and Spanish Catchfly (*Silene vulgaris, S. nutans, S. otites*). These hay meadows become a gigantic cross-country ski area in the winter but now they are the preserve of this lush assemblage of flowering plants with a myriad of invertebrates providing food for the Whinchats that nest in the grass. We see a Dipper on the river and there are Coal Tits and Black Redstarts singing as we return for breakfast.

We are walking locally again today, parking in the nearby village of Gimillan, and heading up into the Vallon de Grauson. The first part of the walk is through cow-cropped meadows, but there are many flowers such as campions, catchflys, rampions and bellflowers. We find Catsfoot (*Antennaria dioca*), Clustered Bellflower, Mountain Cornflower (*Centaurea montana*), Woolly and Alpine Hawkweed (*Hieracium lanatum*, L. *alpinum*),

Mountain Sainfoin (Onobrychis montana), the attractive umbellifer Laserpitium siler, Swallow-wort (Vincetoxicum hirundinaria), Vallais Catchfly (Silene vallesia), St Bernards Lily(Anthericum liliagr) and bright pink Carthusian Pink, alongside the pale Wood Pink and also Cheddar Pink (Dianthus carthusianorum, D. sylvestris and D. gratianopolitanus).

In addition to the flowers there are some butterflies but the weather is not ideal - Small Apollo, Back-veined Whites, Escher's Blues, fritillaries and Marbled Whites. There is a singing Yellowhammer and Rock Bunting. Further up a Fieldfare is briefly seen carrying food and across the valley there are some distant calls of Nutcrackers.

As we enter a wooded part of the valley we find Savin, Common and Dwarf Juniper (Juniperus Sabina, J. communis, J.c. ssp alpinus), Wood Scabious (Knautia dipsacifolia) and Wood Treacle-mustard (Erysimum sylvestre). Out in the open again the banks are crowded with Vipers Bugloss, Oxe-eye Daisy, Blue Lettuce (Lactuca perennis), Wood Forget-me-not, Yarrow, Plume Knapweed (Centaurea uniflora), Common Globularia and Kidney Vetch.

We then cross the Torrent Grauson, walking up through an area of short turf, where we find some good plants of Edelweiss (*Leontopodium alpinum*). Edelweiss is symbolic of high mountains and is seen as a souvenir by many visitors and this has contributed to its demise, despite being a protected plant.

There are many other plants to see —Alpine Avens (*Geum montanum*), Alpine Gypsophila (*G. repens*), Purple and Yellow Milk Vetch (*Astragalus danicus, Oxytropis campestris*), Alpine Toadflax (Linaria alpinum), Alpine, Mountain and Brown Clover (*Trifolium alpinum, T. montanum, T. badium*), Mountain Thrift (*Armeria alpina*) and the diminutive Alpine Bastard Toadflax (*Thesium alpinum*).

We enjoy our picnic under the pine trees, with stunning views towards the glaciers of the Gran Paradiso. After lunch we walk a little further up the valley, exploring the rocky screes and are rewarded with some lovely plants such as Large-flowered Bellflower (*C. alpestris*), the diminutive Mossy Cyphel (*Minuartia sedoides*), Mont Cenis Lousewort (*Pedicularis cenisia*), Yellow Soapwort (*Saponaria lutea*), masses of Alpine Calamint with one plant of stunning white flowers, the handsome Mountain Lentil (*Astragalus penduliflorus*), Large-flowered Houseleek (*Sempervivens grandiflorum*) and some wonderful saxifrage-covered rocks.

We reluctantly head back, taking a different path, across a meadow where a rocky bank is festooned with many sedums including *S. dasyphyllum*, *S. album* and *Sempervivum montanum*. Along the path we also find a very local plant, endemic to the Aosta Valley, *Aethionema thomasianum*, alongside *Silene vulgaris* ssp *prostrata*. On the way down there are Crag Martins overhead and we manage to get some good views of a Crested Tit. Lower down in the area closer to Gimillan a couple of male Red-backed Shrikes are seen.

Day 4

Wednesday 4th July

Today we transfer to France. After an early breakfast we say farewell to our hosts, and head towards Aymavilles, a wine growing area in the Aosta Valley, where there is a magnificent crenellated castle, one of many in the area. Our first stop is to look at some wonderful plants of *Astragalus centralpinus*, another local plant. Then we stop to look at the magnificent Roman bridge at Pondel, an impressive construction which includes an aquaduct and passageway. We then head west towards Courmayer before turning south again to the Col de Petit St-Bernard where we cross back into France.

We stop for refreshments above La Thuile where we hope to spot Ibex on the mountain tops but the low cloud persists, and the weather does not look good. We try to explore some scree area for plants before crossing into France but it is very wet and cold. Nonetheless the Water Pipits are singing and we find Alpine Snowbells (Soldanella alpina), Alpine Butterwort, Frog Orchid, Net-leaved Willow, Spiniest Thistle, Creeping Azalea (Loiselurea procumbens), Gentiana pumila ssp delphinensis, Blunt-leaved Rock Jasmine (Androsace obtusifolia), Alpine Clover (T. alpinum), Bird's-eye Primrose, Alpine Bartsia and Bearberry (Arctostaphylos uva-ursi).

We stop in the small ski resort of La Rosiere for our lunch provisions, but we are all a bit wet and cold so resort to a bar for warm baguettes and hot coffee and chocolate. The friendly host offers us a sample of his homemade liqueur flavoured with mountain herbs.

We now start descending towards Val D'Isere, passing through this very popular ski resort, and head up to the Col de L'Iseran. By now the rain has turned to snow, which in places has blown across the road. We cautiously follow the snow plough down the other side, a Snowfinch is seen but we don't stop, feeling relieved to reach the attractive village of Bonneval-sur-Arc and the broad valley of l'Arc Riv. We reach our hotel in the centre of Lanslevillard and are soon warmed by hot soup and a good meal.

Day 5 Thursday 5th July

Our explorations today are in the area of Mont-Cenis, renowned for its flora. Many species have been named after Mont Cenis, but these plants are also found across the whole range of the Alps. We drive to Lac du Mont-Cenis, taking a minor road around its edge, heading for the Refugio le Petit Mont-Cenis.

Our first stop is to get a closer look at Campanula thirsoides, but there are none to be seen at the usual site but we find plenty of other plants to look at including *Cerinthe minor, Dianthus pavonius, Arenaria ciliata, Silene acaulis* ssp *longiscapa* and *Pedicularis rostratocapitata*.

We stop again nearer the lake and the botanists are soon up the bank finding Martagon and Orange Lily, Scented Solomon's Seal, *Linum alpinum*, many vetches, rampions and campanulas. The scenery is stunning with Lac du Mont Cenis a bright turquoise blue.

We stop at the refugio for coffee and some indulge in crepes or soup, before walking along the valley towards the Col du Petit Mont-Cenis. The weather is improving though there is a cold wind. We explore the valley sides, hoping to find Viola Cenisia, but realistically we are too early but other plants include the tiny brilliant blue stars of Snow Gentian (*G. nivalis*), Nettle-leaved Bellflower (*C. trachelium*), Minuartia recurva, Three-veined Pink (*D. parvonius*), Spotted Gentian, Creeping Cinquefoil (*Geum reptans*), Alpine Pasque Flower (*Pulsatilla alpine*), Starry Saxifrage (*S. stellaris*), Violet Speedwell (*Veronica bellidiodes*), V. allionii, Mont Cenis Lousewort (*Pedicularis cenisia*), a wonderful mound of *Dryas octopetala*, Frog Orchids and among the tiny dark Vanilla Orchids (*Nigritella rhellicani*) we find the red *Nigritella rubra*. All these set amongst masses of Yellow and Purple Milk Vetch, creamy Kidney Vetch, Mountain Sainfoin, Golden Hawksbeard, Globeflowers, Arnica, Alpine Bartsia

We see Kestrel, Northern Wheatear, Water Pipit and have good views of two Alpine Swifts. There are Skylarks singing and many Alpine Choughs feeding on the slopes around us. It is cool although yesterday's snow has all melted so our only butterflies are a Large Blue and Alpine Grizzled Skipper.

We retrace our steps and then drive back towards the edge of Lac du Mont-Cenis to find a picnic spot, though it is difficult to get out of the biting wind. After lunch we return to the river, after watching a very light coloured Fox, to take a look at the scree. Here we find cushions of Alpine Toadflax and Alpine Gypsophila, Dwarf Milfoil (*Achillea nana*), the tiny dark red sedum *Mucizonia sedoides*, Fairy's Thimble and *Coincya richeri*. We then drive to the other side of the lake, where the options are a stroll around the Alpine Garden, visit the information centre or refreshments in one of the cafes.

Day 6 Friday 6th July

Due to the lateness of the season, there is a possibility of us finding Lady's Slipper Orchids, so an early morning hunt is offered! At 6.30am a keen party set off on a local walk in the Foret de Lanslevillard, crossing the river opposite the hotel and striding up the valley. We see no sign of *Cyprepedium calceolus*, but have a lovely walk, finding Military Orchid, Common and Heath Spotted Orchids, Fragrant Orchid, Nodding and Pale Green Wintergreen (*Orthilia secunda*, *Pyrola chlorantha*), Wolfsbane and a stand of the handsome Alpine Sow Thistle (*Cercibita alpina*). There are still birds singing including Blackcap, Garden and Marsh Warblers, the last species we see moving around in its patch of Meadowsweet (*Filipendula ulmaria*)

We are heading west today, through Lanslebourg, to Termignon, where we turn north into the valley of le Doron, driving up to Bellecombe. Our first stop in the woods finds us Bird's Nest Orchid (*Neottia nidus-avis*), Twayblade (*Listera ovata*), Dark Columbine (*Aquilegia atrata*), Round-leaved Saxifrage and Greater Butterfly Orchid.

Further up we stop on hearing the raucous calls of Nutcrackers and are rewarded with a very amenable bird which remains close as we all get a good look in the 'scope.We head to the top where we park the vehicles, walking via Plan du Lac to the refugio of the same name. There is much low cloud about so we abort plans to walk to the Termingnon Gorge, where we had hoped to see Llammergeier, and the thick drizzle hinders any botanising as well so we head for the refugio.

We opt for an early lunch, which the refugio staff let us eat in the warm and dry. Some take the opportunity to warm up with delicious soup. Suitably warmed and dried we emerge into sunshine and continue our walk. In the short turf and scree at the edge of the track are many alpine plants such as Moss Campion, (both ssp longiscapa and exscapa), Blunt-leaved Rock Jasmine (Androsace obtusifolia), Trumpet and Spring Gentians, Veronica aphylla, Mossy Cyphel (Minuartia sedoides), Creeping Azalea (Loiseleuria procumbens), Alpine Clover, Callianthemum coriandrifolium, Sedum atratum, Alpine Milkwort, Southern Butterwort and Alpine Forget-me-not.

We carry on to an area where Ptarmigan are known to frequent but today sadly none are to be seen. There are Wheatears, Water Pipits and Black Redstarts. As the weather has cleared, we turn round and head for the gorge, some taking the gentler route back to the vehicles. In the short turf of the valley we find Lychnis alpina, patches of *Vitaliana primuliflora*, *Gentiana brachyphylla*, *Androsace carnea* ssp *rosea* and *Draba aizoides*. And in the pools near the lake there is a mass of Glacier Crowfoot (*Ranunculus glacialis*).

At the gorge we meet a very helpful mountain guide who shows us a Golden Eagle's Nest on the opposite side of the gorge but there is no activity at this time. He says the Lammergier left half an before we arrived, however as we talk it returns passing over our heads and we get a really good view as it glides down into the gorge.

On our return drive down the valley we stop to photograph some good spikes of *Campanula thirsoides*, also finding *Ornithogalum umbellatum* and St Bruno's Lily. Lower down there are two Common Buzzards on the ground in a fresh cut hay meadow

Day 7

Saturday 7th July

Our last full day of the trip. Some take an early walk behind the hotel where we follow a track through farmland. At the track edge is Large Yellow, Shrubby and Mont Cenis Restharrow (*Ononis natrix, O. fruticosa, O. cristata/cenisia*). Other sightings include Red-backed Shrike, Yellowhammer, Ortolan Bunting a male Redstart and a Roebuck.

We spend the morning walking locally, crossing the river to walk in the woods and meadows along the l'Arc Riv. A Golden Eagle is the first bird to be seen soaring around over the valley. In the first meadow, alongside the mass of scabious, bistort, campanula and vetch, is Dusky Cranesbill (Geranium phaeum), Greater Burnet (Sanguisorba officianalis) and the Alps endemic Stemmacantha rhapontica. Along the trackside is Prunella vulgaris and P. grandiflora, the delicate Tunic Flower (Petrorhagia saxifraga), Veronica urticifolia, V. spicata and masses of the handsome umbellifers Laserpitium siler and L. latifolium. We see Marbled Whites, Titania's Fritillaries and a Hummingbird Hawkmoth. In the Meadowsweet meadows are more singing Marsh Warblers and in the woods Bonelli's Warbler, Chiffchaff and Firecrest are singing.

We then take our picnic up towards Col de l'Iseran, seeing it in a very different light to when we transversed it on our transfer day! We park in a layby and enjoy our picnic in brilliant sunshine. We then explore the scree for plants, zig-zagging between finds. There are large patches of Glacier Crowfoot, and stunning pink patches of Purple Saxifrage (S. oppositifolia), one patch studded with Scree Saxifrage (S. androsacea) We also find small lilac cushions of Petrocallis pyrenaica, small clumps of Mont Cenis Bellflower (C. cenisia), Alpine Toadflax, Creeping Avens, Chamois Cress, Arabis jaquinii, with Slender Gentian (Gentianella tenella) on the edge of the layby. There are Wheatears and a Snowfinch on the scree and a Mountain Fritillary is sunning itself on a rock.

We brave the Col, where there are many tourists taking photos and taking in the stunning views.

On our return to the hotel we stop to photograph Alpine Pasque Flower, and in the valley bottom we look at one of the wonderfully floristic meadows studded with Black Rampion.

Day 8 Sunday 8th July

We have an early start today, to reach Lyon by 10am, so we are very grateful for our early breakfast before setting off in the first light of another lovely day. The weather changes as we leave the mountains behind and we drive through rain for a while. We have an uneventful return flight to the UK.

As always the group makes the trip work well, and we had a really good week of wonderful scenery, walks, flowers, birds and butterflies, greatly enhanced by everyone's enthusiasm.

Species Lists

Plants

| Scientific Name | Common Name | LOCATION SEEN |
|--------------------------------|---------------------------|--------------------|
| DICOTYLEDONS | | |
| Asclepiadaceae | Milkweed family | |
| Vincetoxicum hirundaria | Swallow-wort | |
| Berberidaceae | Barberry family | |
| Berberis vulgaris | Barberry | |
| Betulaceae | Birch family | |
| Alnus viridis | Green Alder | Valnontey |
| | | |

Birds

Grey Heron One seen flying towards Cogne

Lammergeier An adult seen near Plan du Lac above Bellecombe Golden Eagle One seen by some of the group at Lansvillard

Black Kite A few seen in lowland areas

Buzzard Seen on 2 days
Kestrel Seen on 3 days
Wood-Pigeon Seen on 3 days

Stock Dove 1 seen up Doron valley above Termignon

Eurasian Collared Dove 1 seen

Cuckoo Heard on 2 days

Alpine Swift Seen in Mont Cenis area

Common Swift Common

Sky Lark Heard at Plan du Lac and in Mont Cenis area

Crag-Martin Seen on 2 days

House-Martin Common in towns and some mountain areas

White Wagtail Common

Grey Wagtail Several seen or heard along the many streams and rivers

Tree Pipit Heard

Water Pipit Seen on 4 days
Dipper Seen on 2 days

Dunnock 1 seen

Wren Heard on 3 days

Robin Seen or heard on 3 days Common Redstart 2 seen near Landsvillard

Black Redstart Seen on 5 days

Northern Wheatear Several in high mountain areas

Whinchat Common bird of the hay meadows around Cogne

Stonechat 1 seen
Song Thrush Seen on 1 day
Mistle Thrush Seen on 3 days

Fieldfare One seen carrying food in the Grauson valley woods

Blackbird Common

Ring Ouzel One seen on the way up from Gimillan

Garden Warbler Most common singing warbler

Blackcap Seen on 2 days

Lesser Whitethroat Several seen, a family group watched in the Valnontey valley
Marsh Warbler Seen and heard singing in Meadowsweet near Landsvillard
Western Bonelli's Warbler Heard singing in woods between Landsvillard & Bessans

Chiffchaff A few singing birds

Goldcrest Heard in Grauson valley and near Landsvillard

Firecrest Heard near Lansdvillard

Great Tit Seen on 2 days

Coal Tit Seen or heard on 3 days

Crested Tit Good views of a single bird in woods above Gimillan Marsh Tit Heard on walk from Landsvillard towards Bessans

Long-tailed Tit A group seen in the Valnontey valley Treecreeper 1 in the Glauson valley woods

Red-backed Shrike 2 seen above Gimillan and 1 near Landsvillard

Magpie Several seen
Jay Seen on 4 days

Nutcracker Several heard and good views of one in Bois de Suffet

Red-billed Chough A pair at Bellecombe
Alpine Chough Common in the high areas

Carrion Crow A few seen Raven 2 seen

Italian Sparrow Seen on 3 days

Snowfinch Seen below Col d'Iseran

Chaffinch Common
Linnet Seen on 4 days
Goldfinch A few seen
Serin Heard on one day
Ortolan Bunting 1 seen near Lansvillard

Yellowhammer Heard above Gimillan and seen near Landsvillard
