Tour Participants: Suchit Basnet (Leader) with five Naturetrek clients

Day 1

Friday 14th February

The group flew to Kathmandu from either Heathrow via Doha or from Newcastle via Dubai on overnight flights, arriving in Kathmandu the following morning.

Day 2

Saturday 15th February

The group members were met at the airport by Suchit and transferred to Hotel Royal Singi. It was a cloudy day and the temperature was around 18 degrees celcius. The afternoon was free for relaxation. After a short briefing on the tour and the next day's programme, the group members went to their rooms to recover from the journey.

Day 3

Sunday 16th February

After an early breakfast we set off towards Phulchowki Hill with a packed lunch. It was a hazy morning with a little sunshine and the temperature showed 11 degrees. We drove through the relatively empty streets of Kathmandu and reached the base of Phulchowki Hill after 50 minutes. We spent about an hour birding at the Godavari area and found species like Red-billed Blue Magpie, White-crested Laughing Thrush, Asian Barred Owl, Grey-winged Blackbird, Blue-winged Minla, Grey Treepie and Rufous-bellied Niltava just to name a few. Then we drove uphill and reached the top. On the walk down we found species like Himalayan Bluetail, White-browed and Rufous-winged Fulvetta, Green-tailed Sunbird, Stripe-throated and Whiskered Yuhina, Scaly-breasted Wren Babbler (Cupwing) and White-collared Blackbird just to name a few. Fighting our way through the evening traffic back to the hotel was interesting.

Day 4

Monday 17th February

Our 8:30 am flight was unfortunately delayed by six hours due to bad weather at Biratnagar airport. When we eventually reached Biratnagar we were met by our drivers who had brought packed lunches for us. After a late lunch we headed towards Birju Lake where we spent about an hour and a half before we headed towards Koshi Camp. We saw a good collection of ducks like Ferruginous, Pintail, Garganey and Tufted Ducks. The best birds here were a single male Falcated Duck and about 21 Fulvous Whistling Ducks. We also had a good number of Cotton Pygmy Geese and a Booted Eagle. The drive to Koshi Camp took us about an hour and 15 minutes.

Day 5

Tuesday 18th February

The morning started off being misty. We set off after breakfast towards the central part of the Koshi Tappu Reserve. The mist lifted at about 10am and then it became nice and warm with good visibility. We came back to

the camp for lunch and after lunch we visited the northern side of the reserve. The most interesting species of the day were four Swamp Francolins, five Lesser Kestrels, a Lesser Coucal and five species of Owls.

Day 6

Wednesday 19th February

Today, after breakfast, we drove for about an hour to the north of the Koshi Reserve. It was another misty morning, but it cleared up earlier today and by around 9am the visibility was very good. Here the habitat was open country and we found Oriental, Ashy-crowned Sparrow and Sand Larks. We also found some Paddyfield and Richard's Pipits, Yellow-wattled Lapwing, Brahminy Starlings, Bay-backed Shrike and seven Indian Thick-knees. We also saw a single adult plus a mother Bengal Fox with two puppies in its lair.

After lunch we drove to the southern end of the reserve and to the Koshi Barrage. In the afternoon we saw four wild Elephants, Gangetic River Dolphins, Asiatic Golden Jackals, Black-headed Ibis and White-eyed Buzzard just to name a few.

Day 7

Thursday 20th February

We set off today with packed lunches towards Chitwan NP. We stopped near the Koshi barrage and saw eight Grey-headed Lapwings. We made a stop after about an hour and a half and took the opportunity to give our legs a stretch. We then continued and made another stop for a midday break for our picnic lunch. At our lunch spot we saw Chestnut-bellied and Velvet-fronted Nuthatch, Grey-capped Pygmy and Fulvous-breasted Woodpeckers.

It then took us about three hours to reach our lodge at Chitwan. Some of us went down to the high ground overlooking the national park while most took the time before dinner to recover from the long eight hours drive.

Day 8

Friday 21st February

The morning was misty and after breakfast we drove to the nearby wetland. After about 30 minutes the mist started to clear and the visibility was much better. We found a big flock of Black-breasted Weavers, two Ruddy-breasted Crakes, two Cinnamon Bitterns and four Common Cranes. We had excellent views of Paddyfield and Smoky Warblers and Yellow-bellied Prinia and we also found a Hodgson's Bushchat, a Blyth's Pipit and Chestnut-capped Babblers. We then drove to the Rapti river and took a 30 minutes ride on a wooden boat and saw Gharial and Marsh Mugger Crocodiles, River Lapwings and Citrine Wagtails just to name a few. We got back to the lodge for lunch.

After lunch we had an Elephant ride, and the Elephants helped us to find seven Rhinos; a lone one and three mothers with a calf each. The smallest calf was about two months old. We also found a Python that had killed a Ruddy Shelduck in the water and Hog and Spotted Deer and Wild Boars from the high viewing position on the Elephants' backs.

Day 9

Saturday 22nd February

Today we took a picnic lunch and set out after breakfast for a whole day's excursion to explore the Chitwan National Park in an open jeep. It was a fine morning and the previous night's rain had cleared the air. It was a mist free morning and the sun came out early and it started to become warm by 9:30am. At around 10 am we stopped at a tower for some tea and coffee where we saw Oriental Pied Hornbills. We continued on and covered a variety of habitats; from grassland to Sal forest, Riverine and mixed evergreen forests. Our highlights of the day were Great Hornbills, Red-headed Trogon, Greater-necklaced Laughing Thrushes, Blue-bearded Bee-eater, Slender-billed and Yellow-eyed Babblers, Banded Bay Cuckoo and Golden-fronted Leafbird just to name a few. We got back to the lodge at dusk.

Day 10

Sunday 23rd February

We set off at 8 am towards Kathmandu, after breakfast and taking a packed lunch with us. We made a stop at a clear space overlooking the Trisuli river below and found a Blue Rock Thrush, White-capped and Plumbeous Redstarts. On the stony walls Suchit spotted a Wallcreeper. We pulled over to watch and take photographs as it was only about 15 metres away. Suchit also spotted two Black-crested Bulbuls from the moving vehicle so we stopped and had a good look.

Our first stop was at Riverside Spring Resort for a comfort break and drinks. After a short drive we stopped for the Spiny Babbler. We spent about 45 minutes trying to call them. Two birds called back from deep vegetation but unfortunately, they did not move or show themselves, but we had excellent views of an Asian Barred Owl perched on a tree below the highway.

We made a stop to find an Ibisbill but did not find them either. We made a further stop at a small roadside restaurant overlooking the Trisuli River where we had lunch, after which we had to fight the traffic to Kathmandu. We reached the hotel at around 4pm.

Day 11

Monday 24th February

Transfer to Kathmandu Airport, and flight home.
