Day 1

Thursday 19th June

Weather: Stansted – Cloudy. Slovenia – Fine, warm and sunny with some cloud.

Thirteen tour participants met with Paul at the departures gate at Stansted Airport for the Easyjet EZY3245 flight to Ljubljana. Upon our arrival, we completed immigration formalities and collected our luggage, before making our way to the arrivals hall, where we met up with Milan, our local guide, and our driver for the week, Dusan. With luggage loaded, we set off travelling towards Kranj, before joining the motorway northwest to the exit for Bled. Passing through the town we soon had spectacular views of Lake Bled and the imposing Castle Bled, perched some 130m above the lake on the north shore. As we continued on, the road ran beside the Sava Bohinjka River. Before long, we passed through the small town of Bohinjska Bistrica and the villages of Savica and Polje, before arriving in Ribcev Laz, situated at the eastern end of the beautiful Lake Bohinj, and the Alpinum Hotel Jezero, our base for the duration of the tour. Having settled into our rooms, we gathered in reception, where Paul and Milan outlined some of the programme for the week, and also met up with Susan and Peter, the final two members of our party, before going to dinner.

Day 2

Friday 20th June

Weather: Fine, warm and sunny; rain later.

After breakfast at 07.30, we met with Milan at 08.30, before embarking on our first full day. As we were preparing to leave, a Spotted Flycatcher was seen hunting food from its vantage point in a tree just outside the hotel.

Our objective today was to walk the path along the north side of Lake Bohinj. This route would take us through natural woodland, pastures and planted woodland of *Fagus sylvatica* (Beech) and *Picea abies* (Norway Spruce). We began making our way through natural forest, comprised of *Fagus sylvatica* (Beech), *Ostrya carpinifolia* (Hop Hornbeam), *Corylus avellana* (Hazel), *Fraxinus excelsior* (Ash) and *Juniperus communis* subsp. *communis* (Common Juniper). Early finds included *Petrorhagia saxifraga* (Tunic Flower), *Cephalanthera rubra* (Red Helleborine), *Salvia pratensis* (Meadow Clary), *Genista tinctoria* (Dyer's Greenweed), *Anthyllis vulneraria* subsp. *alpestris* (Kidney Vetch), *Clematis recta* (Erect Clematis) and *Epipactis atrorubens* (Dark Red Helleborine). Insects had also started to appear. These included *Cetonia aurata* (Rose Chafer), the caterpillars of Swallowtail butterfly and Water Betony Moth, and Small White, Small Heath and Large Skipper butterflies.

The birds were generally quiet, although European Greenfinch, Common Chaffinch and Coal Tit were all heard. Moving on, *Scabiosa dipsacifolia* (Wood Scabious), *Cornus sanguineum* (Dog Wood), *Dactylorhiza fuchsii* (Common Spotted Orchid) and *Rhamnus saxatilis* (Rock Buckthorn) were added, as well as Pearly Heath and Large White butterflies, and *Lacerta viridis* (Eastern Green Lizard) and *Bombina variegata* (Yellow-bellied Toad).

We took lunch where a stream emptied into the lake. By now the sun was rather warm and more butterfly species were active. These included Pearl-bordered Fritillary, Silver-washed Fritillary, Marbled Fritillary, Comma Butterfly, Blue-spot Hairstreak, Wood White and Woodland Brown. In addition, Chequered Skipper, Wood White, Holly Blue, and Large Skipper butterflies were also added. Moving on, we found *Cephalanthera damasonium* (White Helleborine), *Hacquetia epipactis* (Hacquetia), *Gymnocarpium robertianum* (Limestone Fern), *Asplenium trichomanes* subsp. *quadrivalens* (Maidenhair Spleenwort), *Asplenium viride* (Green Spleenwort) and *Dryopteris filix-mas* (Male Fern). After crossing a boulder-filled dry river bed, we added *Astrantia bavarica* (Bavarian Masterwort), *Dianthus sternbergii* (Sternberg's Pink), *Cirsium erisithales* (Yellow Melancholy Thistle), *Silene alpestris* (Alpine Catchfly) and the leaves of *Maianthemum bifolia* (May Lily).

We were now nearing the village of Ukanc, our destination, and the point where we planned to catch the boat back to Ribcev Laz. We ended the day with more exciting finds. Heath Fritillary and Clouded Yellow butterflies were added, together with *Campanula glomerata* (Clustered Bellflower), *Lunaria redivida* (Perennial Honesty), *Thalictrum aquilegifolium* (Great Meadow-rue), *Telekia speciosa* (Large Yellow Ox-eye), *Aruncus dioicus* (Goat's-beard Spiraea) and *Orobancha gracilis* (Slender Broomrape).

From Ukanc, we caught the boat back to the jetty at Ribcev Laz, near our hotel, just as the rain began to fall.

Day 3

Saturday 21st June

Weather: Fine, warm and sunny, with some cloud

Today, we boarded the bus at the hotel after breakfast, for the journey to Goreljek, on the Pokljuka plateau, situated northeast of Ribcev Laz. We made our way up through Bohinjska Bistrica, before turning left and beginning to climb. We drove up through Jereka and Gorjuse, before stopping at the Barje Sijec Reserve. We began by exploring the verges and some coniferous woodland on the north side of the road. Early finds included *Corallorhiza trifida* (Coralroot Orchid), *Gymnocarpium dryopteris* (Oak Fern), *Phegopteris connectilis* (Beech Fern), *Equisetum sylvaticum* (Wood Horsetail), *Ranunculus aconitifolius* (Aconite-leaved Buttercup) and *Luzula luzuloides* (White Woodrush).

At this point we moved to the other side of the road, and an extensive area of peat bog, the southern-most in Europe. Here we found *Dactylorhiza incarnata* subsp. *pulchella* (an Early Marsh Orchid), *Gymnadenia conopsea* subsp. *densiflora* (Marsh Fragrant Orchid), *Andromeda polifolia* (Bog Rosemary), *Drosera rotundifolia* (Round-leaved Sundew), *Vaccinium oxycoccus* (Cranberry) and *Eriophorum vaginatum* (Hare's-tail Cotton-grass), among many more. We also recorded Heath Fritillary and Woodland Ringlet butterflies.

We now moved on to visit the Sotno Barje peat bog, passing summer cottages and meadows. Here we found *Veratrum lobelianum* (Green False Helleborine), *Melampyrum sylvaticum* (Wood Cow-wheat), *Homogyne discolor* (a purple Colt's-foot), *Pinus mugo* (Dwarf Mountain Pine) and *Arctostaphylos uva-ursi* (Bearberry). Searching a small meadow adjacent to the bog, we found *Campanula barbata* (Bearded Bellflower), *Gymnadenia albida* (Small White Orchid), *Pedicularis verticillata* (Whorled Lousewort) and *Arnica montana* (Arnica). We also recorded Common Firecrest and European Crested Tit. It was now time to return to the bus, where we took our picnic in an adjacent meadow. During lunch, several Red Crossbills were seen feed in nearby *Picea abies* (Norway Spruce).

After our meal, we set off the short distance to explore another area of conifer woodland. Along the way, we found a good specimen of *Saxifraga rotundifolia* (Round-leaved Saxifrage). The wood produced *Moneses uniflora* (One-flowered Wintergreen), *Maianthemum bifolia* (May Lily), *Neottia cordata* (Lesser Twayblade), two small clumps of *Corallorhiza trifida* (Coralroot Orchid) and *Coeloglossum viridis* (Frog Orchid).

We now moved on towards the village of Koprivnik, making a stop to photograph a splendid stand of *Vicia sylvatica* (Wood vetch) on a verge. Whilst we were there, we also added *Phyteuma ovatum* (Dark Rampion), *Phyteuma orbiculare* (Round-headed Rampion), *Veronica urticifolia* (Nettle-leaved Speedwell) and *Impatiens parviflora* (Small-flowered Balsam). An adjacent meadow produced *Aquilegia vulgaris* (Wild Columbine), *Gymnadenia conopsea* subsp. *conopsea* (Fragrant Orchid), *Neottia nidus-avis* (Bird's-nest Orchid) and *Tofieldia calyculata* (Tofield's Asphodel). Woodland Brown, Small White and Chequered Skipper butterflies, and Shaded Broad-bar and Burnet Companion moths were also added.

The return journey, to Ribcev Laz, took us through Jereka, Cesnjica, Studor, where we stopped to photograph the typical hay drying racks, and Stara Fuzina, arriving back at the hotel in good time for dinner.

Day 4

Sunday 22nd June

Weather: Fine, warm and sunny.

Today, we planned to explore a new area for the tour, the Mangart Saddle. After an early breakfast at 06.30, we joined the bus and were on the road by 07.30. Leaving Ribcev, we made our way via Bohinjska Bistrica to Bled, and north to the motorway, which we joined westwards to Jesenice and Kranjska Gora, before crossing the border into Italy. Along the way a Common Buzzard and Barn Swallows were seen. Continuing on, we passed through Tarvisio before turning east at Cave del Predil, and making a stop at the Passo di Predil. Here, butterflies were quite active in the morning sun, with Black-veined White, Meadow Brown and Duke of Burgundy added to the list. However, the main reason for this stop was to search for *Iberolacerta horvathi* (Horvath's Rock Lizard), and we were not disappointed, with two specimens being found by Milan. We also saw *Valeriana montana* (Mountain Valerian), *Genista radiata* (Southern Greenweed) and *Gentiana clusii* (Clusius' Gentian).

We now moved on upwards, above the tree-line, to the Mangart Saddle (c.2000m), a pass set below the imposing Mangart peak (2679m). Parking the bus we set off to explore an area of rocky limestone outcrops and grassland, below the Saddle. Here we found *Rhodothamnus chamaecistus* (Dwarf Alpenrose), *Saxifraga burseriana* (One-flowered Cushion Saxifrage), *Veronica alpina* (Alpine Speedwell), *Ranunculus alpestris subsp. traunfellneri* (an Alpine Buttercup), *Dryas octopetala* (Mountain Avens), *Pulsatilla alba* (White Pulsatilla), *Salix reticulata* (Net-leaved Willow), *Rhodiola rosea* (Roseroot) and many more. There was some activity on the insect front with Mountain Green-veined White quite abundant and also Small Tortoiseshell. Water Pipit, Northern Wheatear, and Alpine Chough were all present as well.

After enjoying our picnic in the warm sunshine, we took the bus up to the top of the saddle, where we began a fairly leisurely walk down to where the bus had returned to wait for us. There was still quite a lot of snow remaining, but we still found new plants. *Petrocallis pyrenaica* (Pyrenean Whitlow-grass) carpeted the ground at one point, and *Soldanella alpina* (Alpine Snowbell) was scattered in the grass around the melting snow patches. There was also *Pritzelago alpina* (Chamois-cress), *Bartsia alpina* (Alpine Bartsia) and *Pinguicula alpina* (Alpine Butterwort). Rejoining the bus, we enjoyed a cup of coffee or tea before starting on the homeward journey.

We made one final stop at Zelenci, just west of Kransjka Gora, where we explored an area of woodland and a natural spring. *Lamium orvala* (Balm-leaved Archangel), *Myrrhis odorata* (Sweet Cicely), *Paris quadrifolia* (Herb-paris) and *Anemone trifoliata* (Three-leaved Anemone) were all found, before we returned to the car park to enjoy late afternoon ice creams.

It was now time to complete our return journey back to the hotel in time for dinner.

Day 5

Monday 23rd June

Weather: Fine, warm and sunny with a breeze; heavy rain later.

After breakfast, we boarded the bus for the short journey to the car park above Stara Fuzina. Here we took the track up the beautiful Korita Mostnice Gorge, passing through forest, past wet rocks and also open areas of scrub. Before leaving the car park, we found Marbled White, Large Skipper and Pearly Heath butterflies, the web of *Agelena labyrinthica* (Labyrinth Spider), and a good stand of *Betonica officinalis* (Betony). As we began to ascend the path, European Crested Tit, European Greenfinch and Eurasian Jay were seen and European Robin and Common Chaffinch were heard. *Vinca minor* (Lesser Periwinkle), *Viburnum lantana* (Wayfaring Tree), *Genista germanica* (Prickly Greenweed) and *Cephalanthera rubra* (Red Helleborine) were all recorded. Crossing the river gorge at the Devil's Bridge, we made our way on up the east side of the gorge, through the forest. Woodland Brown, Speckled Wood and Wood White butterflies were seen, as well as *Actaea spicata* (Baneberry), *Turritia glabra* (Tower-cress) and *Aconitum lycoctonum subsp. vulparia* (Wolf's-bane).

Crossing back over the river, we emerged from the gorge at Pl. Koca na Vojah, a refugio, where we had lunch of goulash or mushroom soup. After our meal we continued up the gently ascending path, passing *Euonymus verrucosus* (a Spindle Tree), *Phyteuma nigra* (Black Rampion) and *Stachys alpina* (Alpine Woundwort). Hay meadows now opened up before us and in the margins we found *Hypericum richeri* (Alpine St. John's-wort), *Campanula glomerata* (Clustered Bellflower), *Gymnadenia conopsea subsp. conopsea* (Fragrant Orchid) and *Dactylorhiza fuchsii* (Common Spotted Orchid) together with scattered spikes of *Dianthus barbatus* (Sweet William) and *Geranium*

phaeum (Dusky Crane's-bill). In the pasture and along the trackside we also saw Purple-edged Copper, Woodland Ringlet, and Large Skipper, Heath Fritillary, Duke of Burgundy Fritillary, Dark Green Fritillary, Poplar Admiral, Southern White Admiral and Lesser Marbled Fritillary butterflies.

From the pastures, we re-entered the woodland, where the path took us up to the Slape Mostnice (Mostnice Waterfall). After admiring the falls, which were quite substantial due to overnight rain, we made the descent back to where we had lunch, where we took refreshments, and the minibus was waiting to return us to the hotel in time for dinner.

Day 6

Tuesday 24th June

Weather: Mostly cloudy with some light rain and occasional sunny periods; heavy rain later.

Once again, today our bus took us up to the mountain meadows at Vogar (1054m), high above the Bohinj Lake, on the north side. Two thirds of the way to the top, we stopped to explore some cliffs beside the quiet mountain road. Here we saw *Primula auricula* (Bear's-ear), although it was well past its best, *Saxifraga cuneifolia* (Spoon-leaved Saxifrage), *Rhamnus alpinus subsp. fallax* (an Alpine Buckthorn), *Laburnum alpinum* (Alpine Laburnum), *Campanula scheuchzeri* and a good show of *Saxifraga crustata* (Encrusted Saxifrage). We now moved up to a rough car park in the forest, from where we began to explore. In the first meadow we examined, we found *Gymnadenia conopsea subsp. conopsea* (Fragrant Orchid), *Eriophorum angustifolium* (Common Cotton-grass), *Parnassia palustris* (Grass-of-Parnassus), *Dactylorhiza fuchsii* (Common Spotted Orchid) and our first, solitary *Lilium carniolicum* (Carnic Lily). Spotted Flycatcher, Barn Swallow and Great Tit were all seen, and Common Chiffchaff, Eurasian Blackcap and European Robin were heard. However, the highlight of the meadow was a large, female *Salamandra salamandra* (Fire Salamander). As we progressed, moths began to become active, with Lead Belle, Silver Y, Speckled Yellow, Mottled Beauty, Silver-ground Carpet and Beautiful Carpet all recorded.

Moving on through more meadows, we found more *Lilium carniolicum* (Carnic Lily) and *Lilium martagon* (Martagon Lily). A few butterflies now started to appear, with Black-veined White, Heath Fritillary, Wood White, Woodland Brown and Small White all seen. We now moved on, through more forest, to a splendid view-point overlooking the lake and across the valley to Vogel. *Trifolium rubens* (Red Trefoil), *Vicia sylvatica* (Wood vetch) and *Aconitum lycoctonum subsp. vulparia* (Wolf's-bane), and a Nine-spotted moth were also added. We now made our way back to the bus for lunch. During the meal a Common Cuckoo flew across the valley, and we also added *Hoplia caerulea* (a Chafer) and *Leptura rubra* (a Longhorn Beetle).

For the afternoon, we now moved back down to Stara Fuzina, and on up to Ukanc and the Slap Savica Waterfall. Along the way we stopped to watch a Red-backed Shrike and a pair of Common Buzzards. At the waterfall car park, we left the bus and made the short wall up to the waterfall, which, due to the torrential overnight rain, was as spectacular as Milan had ever seen it. As we progressed, White-throated Dipper was seen on the river. In the forest, on the way down, we found *Scopolia carniolica* (Scopolia) and *Phyteuma scheuchzeri* (Horned Rampion), before taking some refreshments at the refuge.

Day 7

Wednesday 25th June

Weather: Rain to mid-morning, then cloudy. Rain in the afternoon, becoming heavy later.

Owing to the amount of rain we had experienced over the preceding evenings, Paul decided that the steep path at the start of the route to Crna Prst would be too treacherous, so he and Milan elected to visit the Vintgar Gorge instead. Joining our bus, we drove eastwards to Bohinjska Bistrica, and then we took the road to Bled, before turning left towards the villages of Podhom and Vintgar, to the north of the town.

Leaving the vehicle in the car park, we set off along the paths and walkways alongside the Radovna River. Initially, the route took us mainly through forest, but it was not long before imposing limestone cliffs were rising above us. Once again, due to the recent rain, the river was quiet high, and the white water, spectacular. As we went, we recorded *Stellaria nemorum* (Wood Stitchwort), *Polystichum setiferum* (Soft Shield Fern), *Aruncus dioicus* (Goat's-beard Spiraea) and *Asplenium scolopendrium* (Hart's-tongue Fern). Eurasian Wren, Common Chaffinch and Eurasian Blackcap were all heard calling. Further into the gorge, White-throated Dipper and Grey Wagtail were both very active. After about an hour, the rain began to ease off. At the bottom of the walk, there was a Waterfall, and we took well-earned refreshments at the small refuge. On the return leg of the walk, we added *Campanula trachelium* (Nettle-leaved Bellflower), *Cardamine pentaphyllos* (Five-leaflet Bitter-cress), *Valeriana saxatilis* (Rock valerian), *Actaea spicata* (Baneberry) and *Impatiens noli-tangere* (Touch-me-not Balsam). Excellent views were had also of the Dippers and Grey Wagtails, both at nests and feeding. Back at the car park, we took our picnic lunch, during which several Nine-spotted moths flew past, and Song Thrush was heard.

The afternoon was spent in the town of Bled. Here, tour group members explored the famous castle, walked the lake shore or looked around the small town, before rejoining the bus for the return journey to Ribcev Laz. Along the way we saw Grey Heron and Red-backed Shrike.

Day 8

Thursday 26th June

Weather: Cloudy with sunny periods.

Our final day in Slovenia began with a leisurely breakfast, and time for packing. Some of the group chose to spend time around the hotel, whilst the rest of the group took the bus up to Stara Fuzina, where we spent a leisurely couple of hours exploring the village, the river bank and the adjacent meadows. Common House Martins, Spotted Flycatchers and Barn Swallow were feeding young, and a distant European Wryneck was heard. Butterflies included Duke of Burgundy Fritillary, Dark Green Fritillary, Wood White and Blue-spot Hairstreak. The walls of the village had a good show of *Sedum sexangulare* (Tasteless Stonecrop) and elsewhere, *Echium vulgare* (Viper's-bugloss) was growing in a lane.

We now returned to the hotel to meet up with the rest of the group, before returning to Stara Fuzina and the 'Domaca Gostilna Mihovc', a traditional Slovenian guesthouse/restaurant, where we had our lunch. It was now time to re-join the vehicle for the journey back to Ljubijana Airport. Here, we bid farewell to Milan and Dusan, before catching our Easyjet flight EZY 3246 to Stansted.
