Tour participants: Andy Smith (leader), Don (local guide) and Jaeb (fixer) with ten Naturetrek clients

## Day 1

**Saturday 28th February**

The group assembled at Heathrow in the morning ahead of our lunchtime departure to Bangkok.

## Day 2

**Sunday 1st March**

We arrived into Bangkok airport in the early morning and had a comfortable transfer before our mid-morning flight up to Chiang Mai. There, we met up with Don, Jaeb and our drivers and headed off to a nearby restaurant for a bite of lunch. We then set a course for Doi Inthanon National Park, our venue for the next few days. En route we made a couple of stops.

The first was in some dry, short-cropped parkland overlooking a small lake, where a quick-fire introduction to Thai birding ensued; in a very short time we saw a fantastic range of birds including several Indian Thick-knees, a dozen or more Red-wattled Lapwings, five Savannah Nightjars, a Burmese Shrike, a pair of Pied Bushchats, some Asian Green Bee-eaters and Ashy Woodswallows, both Purple and Ornate Sunbirds, and a couple of Small Minivets. The second stop was by a bridge over the Ping River. In the wonderful late afternoon sunshine, we saw a further selection of avian delights, this time headlined by over 150 Small Pratincoles, dozens of Black-winged Stilts, several stunning Chestnut-headed Bee-eaters, an Indochinese Roller, some Wire-tailed Swallows, both Citrine and Eastern Yellow Wagtails, and our first Asian Openbills.

Content with our first afternoon, we completed the journey to Doi Inthanon and arrived in good time to settle in before dinner.

## Day 3

**Monday 2nd March**

After an early breakfast at the hotel, we drove into the National Park and up to the summit of Doi Inthanon, the highest point in Thailand. It was a beautiful, clear, sunny morning and, wrapped up against the early cold, we explored along a boardwalk through an excellent tract of swamp forest. Success came immediately with a pair of beautiful Rufous-throated Partridges scratching around in the leaf litter, and they were followed by a procession of high mountain specials, including Green-tailed Sunbird, Bar-throated Minla, Rufous-winged Fulvetta, Himalayan Shorttail, Yellow-bellied Fairy Fantail, Black-backed Sibia, Mountain Tailorbird, Ashy-headed Warbler and a brief Slaty-bellied Tesia. There was a pair of Pygmy Cupwings too (amazing little things scuttling through the ground vegetation), a dazzling male Himalayan Bluetail, a Blue Whistling Thrush, both Eye-browed and Grey-sided Thrushes, and a colourful gang of Silver-eared Laughingthrushes. It was a thrilling couple of hours which ended with a welcome cup of coffee in the car park.

We dropped down the valley to a stretch of fast-flowing river, where we had some pretty good views of a pair of Slaty-backed Forktails alongside a Hill Blue Flycatcher, a Plumbeous Water Redstart and a dazzling male White-capped Redstart. A restaurant lunch followed, and then we headed off to one of the several bird hides in the area, this one at the interface between a coffee plantation and an area of hill forest. We quickly settled down, and with the food put out, sat back to enjoy a procession of birds. Star appearances included a male Siberian Blue Robin, a pair of White-tailed Robins, a superb Orange-headed Thrush, an Emerald Dove and four mighty Puff-throated

Bulbuls. There were Buff-breasted and Grey-throated Babblers too, plus a White-throated Fantail, some Grey-cheeked Fulvettas, a lovely little White-bellied Erpornis and a number of Himalayan Striped Squirrels.

We finished the afternoon in an area of dry forest, with sightings of Black-headed Woodpeckers, Sooty-headed Bulbuls, a Lineated Barbet and a couple of diminutive Collared Falconets. It had been a great day!

## Day 4

## Tuesday 3rd March

Shortly after dawn, we were back in the dry forest, and enjoyed improved views of Collared Falconets (at least five) and Black-headed Woodpeckers (a party of six), plus a Greater Racket-tailed Drongo, a lovely Purple Sunbird and a perched Rufous-winged Buzzard. We went on to a patch of mixed forest and scrambled down into a swampy dell with a feeding station. All was quiet at first, but as soon as we put some food out the birds appeared, and we found ourselves watching a pair of Large Niltavas, a male Himalayan Shorttail, a Lesser Shorttail, a White-gorgeted Flycatcher and a Slaty-bellied Tesia, all at close range. Meanwhile, several Silver-eared Mesias, a Lesser Racket-tailed Drongo and a pair of Rufous-capped Warblers moved around in the trees above: not bad!

After a coffee break back at the vehicles, interrupted by a pair of Hume's Treecreepers, a Black-backed Sibia and a Clicking Shrike-babbler, we took a stroll down the lane and concluded the morning with a further range of exciting species. These included a Stripe-breasted Woodpecker, a Striated Bulbul, a pair of Yellow-cheeked Tits, three Little Pied and a male Slaty-backed Flycatcher, and a couple of Black-headed Sunbirds. A Banded Bay Cuckoo put in a frustratingly brief appearance, but we finished up with sensational views of a Hodgson's Frogmouth on its nest low in a tree right by the track: amazing!

After another restaurant lunch, we proceeded to an area of forest and scrubby fields at Patung, where we saw some Flavescent Bulbuls, a Hill Prinia, a pair of Grey Bushchats and a couple of Long-tailed Broadbills, and enjoyed a series of fly-pasts by a Large Hawk-Cuckoo. After this, we drove some distance to an area of open stubble fields with patches of scrub, a contrast to all the various forested sites we had thus far visited. Here we found Oriental Pratincoles, Red Collared Doves, Chestnut-capped, Blue-tailed and Asian Green Bee-eaters, Burmese and Brown Shrikes, Plain-backed Sparrows and Black-collared Starlings. The hoped for Bush Larks, both Singing and Indochinese, proved hard to see on the ground, but we did flush a Rain Quail during our search, which made for excellent compensation.

## Day 5

## Wednesday 4th March

We were away from Doi Inthanon straight after breakfast, and our first stop of the morning was by a slow-moving river with extensive shingle banks, below a small dam, at place called Mae Tang. We couldn't find any of the hoped-for Long-billed Plovers, but we did see a good range of other things, including a pair of Greater Painted-snipes (very nice!), a couple of White-breasted Waterhens, a few Little Ringed Plovers, two Green Sandpipers, both Common and White-throated Kingfishers, and lots of Edible-nest (Germain's) Swiftlets.

We proceeded to the temple at Doi Chiang Dao. Set in a beautiful forested valley, this proved to be a very productive site, and in an exciting hour or so we saw lots of birds. Among the highlights were a lovely male Pintailed Green Pigeon, a Blue-eared Barbet, a couple of Black-hooded Orioles, a Violet Cuckoo, several Streaked Yuhinas, two Blue-winged Leafbirds and some Black-headed Bulbuls. Raptors were much in evidence too: our

final tally was two Crested Goshawks, two Shikras, two Crested Serpent Eagles, a Crested Honey Buzzard and a Jerdon's Baza!

Hodgson's Frogmouth

Crimson Sunbird

Scarlet-faced Liocichla

Spot-bellied Eagle-Owl

We ate an excellent lunch at a rustic restaurant nearby, then continued our journey, reaching another temple site in some forested hills at Doi Ang Khang in the mid-afternoon. At a feeding station here, we enjoyed fabulous views of Black-breasted Thrushes, Blue-winged Minlas, Silver-eared Mesias, Mountain Bulbuls and a pair of Large Niltavas. A Grey-winged Blackbird appeared briefly for some of us, but several dazzling Mrs. Gould's Sunbirds showed well for everyone. A last stop a little down the road produced a Golden-throated Barbet, a Collared Finchbill, and several spectacular Spot-winged Grosbeaks. After this it was heads down for the last stretch of the drive to Tha Ton.

## Day 6

Thursday 5th March

Having left our base at Tha Ton before dawn, we headed up to the top of the famous Doi Lang ridge, close to the Burmese border, where we spent the day birding along the road, exploring both forest and semi-open country.

The road was very quiet, and the whole area was scenic and stuffed full of great birds. During an action-packed day, we saw highlights too numerous to list in full, but which included such amazing species as Scarlet-faced Liocichla, Grey-faced and Spot-breasted Parrotbills, Maroon and Slender-billed Orioles, White-browed and Red-eyed Scimitar Babblers, Black-throated Bushtit and Speckled Piculet. There were Brown-breasted and Black Bulbuls too, plus Crested Finchbill, Collared Babbler, Grey Treepie, Long-tailed Sibia and even, at the end of the afternoon, a pair of Mountain Bamboo Partridges. By any birding standard, it was a wonderful day!

## Day 7

## Friday 6th March

We were up on Doi Lang ridge early again today, to try to pick up some of the special species that we had missed yesterday. Our top target was Mrs. Hume's Pheasant, and instead of waiting at the usual feeding station where rather too many photographers were already installed, we drove on slowly along the road. This proved to be a great move, because within a few minutes we came across two different pairs of these rather magnificent pheasants at the roadside, and enjoyed some good views of them! A little further, on we stopped in a lovely stretch of old growth forest and hit another jackpot, in the form of a pair of superb Himalayan Cutias, which were rapidly followed by a Giant Nuthatch!

The morning could hardly have got better, but after a bite of breakfast we added point-blank views of a male Siberian Rubythroat, and then enjoyed a lovely encounter with an exquisite little Sapphire Flycatcher, busily zapping around the sub-canopy. Other goodies, alongside repeats of many of yesterday's birds, included a few Spectacled Barwings, a pair of nest-building Long-tailed Minivets, a male Orange-bellied Leafbird, a Stripe-breasted Woodpecker and a couple of Hair-crested Drongos. Delighted with our success, we returned to Tha Ton for some lunch and a siesta, during which some of the group saw a dazzling male Pied Harrier as it passed low over the hotel.

In the late afternoon, we went out to an area of rice paddies close to Tha Ton, where we found Oriental Pratincoles, Oriental Skylarks, Singing Bushlarks, Richard's, Paddyfield and Red-throated Pipits, Pied Bushchats, Amur Stonechats and around a hundred Yellow-breasted Buntings. After a while, some of the group returned to the hotel. The remaining die-hards pushed on and found a lovely Chestnut-eared Bunting, some Grey-headed Lapwings, a singing Striated Grassbird, a brief Pied Harrier and a roosting assembly of over eighty Black Drongos. They got back to the hotel only just in time for dinner, but it had been worth it!

## Day 8

## Saturday 7th March

After another early breakfast, we boarded the buses and drove to Chiang Rai airport for our mid-morning flight south to Bangkok. Our flight departed on time, and after lunch at a lakeside restaurant, complete with Black-capped and Collared Kingfishers, we headed to an area of salt pans at Khok Khan. Our chief target here was the iconic Spoon-billed Sandpiper, and after a short search of the small waders present, we found one, and then a second (thanks Roy), and enjoyed some really excellent views of them foraging and preening. What great little birds! The other waders present, all close and in good light, included Red-necked Stints, Broad-billed, Curlew and Marsh Sandpipers, Greater and Siberian Sand Plovers, and a couple of Great Knots. With Little Terns and Painted Storks passing overhead, it was a happy crew that returned to the vehicles for the onward journey to Baan Maka.

## Day 9

## Sunday 8th March

A full morning in Kaeng Krachen National Park started shortly after dawn with a walk along a quiet road, through a lovely stretch of forest. The birding was sensational, with highlights including Rufous and Streak-breasted Woodpeckers, Greater Yellow-nape, Thick-billed and Wedge-tailed Green Pigeons, Green-eared and Blue-cheeked Barbets, and Blue-bearded Bee-eaters. There were Golden-fronted and Blue-winged Leafbirds too, plus a Dollarbird, a pair of nest-building Golden-headed Mynas, Sultan Tit, Swinhoe's Minivet and Dark-necked Tailorbird. Mammals seen included a Black Giant Squirrel and a brief Yellow-throated Marten.

We reached the main visitor centre/campground in the late morning and walked along a quiet track through another section of forest. Here we added sightings of Abbott's Babbler, Ochraceous Bulbul, Great Iora and Brown-backed Needletail, and enjoyed some lovely views of Ruby-cheeked and Crimson Sunbirds.

After lunch at the restaurant in the campground, we drove out of the park to Mr. Bird's hide for an afternoon session. It proved to be a lot of fun. Top of the bill were a pair of Kalij Pheasants and a Grey Peacock Pheasant, both spectacular species, but the supporting cast included Greater and Lesser Necklaced and White-crested Laughingthrushes, Greater Flamebacks, Pin-striped and Puff-throated Babblers, Black-naped Monarchs, Racket-tailed Treepies and Grey-capped Emerald Doves. A pair of Band-backed Partridges put in a couple of appearances too, while a male Pied Hornbill dropped in for a while, and even a Large Scimitar-Babbler came in for a brief drink. Meanwhile, Himalayan Striped and Grey-bellied Squirrels were constantly in view; a couple of Lesser Indo-Malayan Chevrotains (Mouse Deer) came by, and at least three Northern Treeshrews made regular high-speed raids on the food. It was a breathtaking couple of hours: there was so much to see, and all so close!

## Day 10

## Monday 9th March

Another excellent morning walking tracks and trails in Kaeng Krachen produced Black-and-yellow, Banded and Silver-breasted Broadbills (wow!), Buff-rumped Woodpecker, Eastern Crowned and Sulphur-breasted Warblers, Common Iora and a number of yesterday's species, including Sultan Tit, Green-eared Barbet and Golden-crested Myna. We also saw another Giant Black Squirrel, some Dusky Langurs and clouds of colourful butterflies, and enjoyed fabulous encounters with a couple of families of Lar Gibbons.

After lunch back at the campground restaurant, we boarded a couple of 4x4 trucks and took a bumpy ride to the "top of the mountain". We admired the views of forested hills stretching away into Burma, and encountered a good range of birds, including Ashy, Mountain and Olive Bulbuls, Brown Shrike, Yellow-bellied and Radde's Warblers, several Hume's White-eyes and an elusive Rufous-browed Flycatcher. Also here were a pair of (presumed male) Blue-throated Barbets, engaged in a prolonged and violent tussle. Perched atop an old stump and oblivious to us, they went at each other with such energetic vigour that it seemed as if one or other of them would surely get damaged. The encounter went on for some minutes until, at some invisible signal, they abruptly broke off and flew away.

Halfway back down the mountain, we stopped for a while and were rewarded with sightings of a flock of Vernal (aka 'infernal') Hanging Parrots, and then a pair of Long-tailed Broadbills. These last, extraordinary and beautiful birds made it a "four broadbill day". A little further down the road, we lucked in on the extraordinary spectacle of at least fifteen Great Hornbills hanging around in the trees at the top of the ridge above us. Posturing to each other

for some time before flying off in a “follow my leader” fashion, they presented a wonderful sight to finish the afternoon, but we weren’t done yet. Back in our own vehicles and driving out of the park as the light was beginning to fade, we came around a bend and found a Leopard standing in the road ahead of us! Wow! Unfazed by us, it walked slowly along the road for a while and then cut off to the left, strolled around a small pond and sat down. Following discreetly, we had some great views of it: what a beautiful creature it was, and what an amazing encounter with which to conclude the day!

## Day 11

## Tuesday 10th March

Having left Baan Maka after an early breakfast, our first engagement was in another of the local bird hides. Once again, we were treated to a veritable extravaganza of birds, some almost close enough to touch. They included a pair of Grey-headed (Black-naped) Woodpeckers, a Large Scimitar-Babbler, both Hainan and Indochinese Blue Flycatchers, three Siberian Blue Robins, several Red Junglefowl, Puff-throated, Pin-striped and Abbot’s Babbler and a pair of White-rumped Shamans.

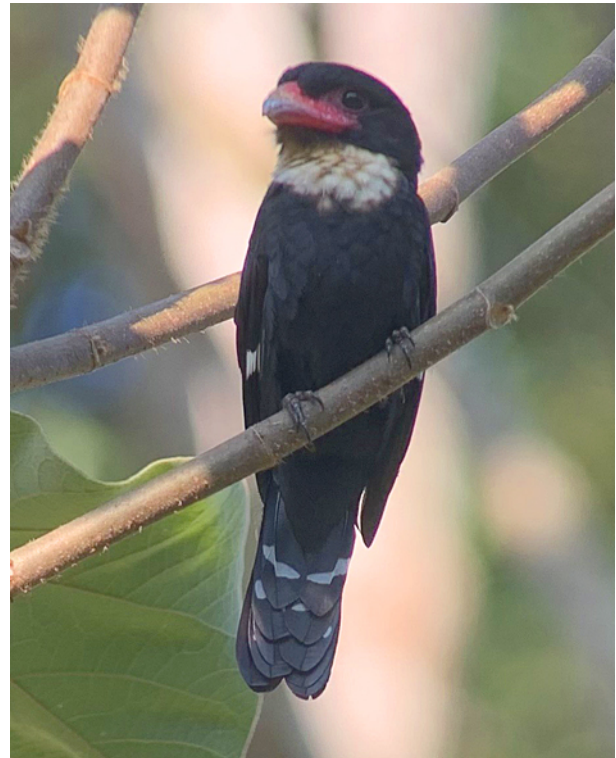

Spoon-billed Sandpiper

Large Niltava

Orange-breasted Trogon

Dusky Broadbill

After this, we drove some distance to an area of tall bamboo thickets around some mineral springs, where we found at least four of the hoped-for Little Cuckoo-Doves and a range of other bits and pieces. A restaurant lunch followed, and then we continued to an extensive area of rice paddies. A couple of stops here produced Javan Pond Herons, Greater Spotted, Steppe and Booted Eagles, Brahminy and Black-winged Kites, Bluethroat, Plain Prinia, Golden, Baya and Streaked Weavers, Pied Starlings and a fair bit more. It was a lot to take in! From here, it was just a short drive to our lovely beachside accommodation at The Fisherman's Rest.

## Day 12

## Wednesday 11th March

Our first stop today was at an extensive area of salt pans. A mass of waders and other wetland birds greeted us, and we spent a happy couple of hours working our way through them. Top highlights were a flock of about fifty Nordmann's Greenshanks, over fifty Terek Sandpipers, and literally thousands of Great Knots. We also had the opportunity to see and compare Greater and Siberian Sand Plovers, Kentish Plovers, Marsh, Curlew and Broad-billed Sandpipers, Red-necked Stints and lots more. On one pan there were over five hundred Whimbrels, and on another over a hundred each of Caspian and Little Terns. There were good numbers of Painted Storks around too, and we also had some good views of Spot-billed Pelicans, both in the air and on the water.

After the salt pans, we went on a boat trip along a mangrove-lined river, and out to a sand spit beach. A Collared Kingfisher and an Asian Water Monitor enlivened the journey out, and at the spit itself we spent a bit of time working through the mix of small plovers present, until we were satisfied that we had seen both Malaysian and White-faced. A Greater Crested Tern roosting among a flock of Caspians on an offshore shoal was a good find, and a couple of Pacific Reef Herons added further spice, as did a pair of Yellow-bellied Gerygones in the mangroves at the top of the beach.

We had lunch and a short siesta back at the hotel, and then in the late afternoon some of us went out again. At another patch of salt pans, we finally found some Asiatic Dowitchers, about a dozen in all, and also had some lovely views of a large flock of Painted Storks busily feeding: very colourful! At a water treatment works, we saw the world's largest Asian Water Monitor (a veritable monster!), plus Black-capped Kingfisher, Pied Fantail, lots of Indian Cormorants and a surprise flock of Daurian Starlings. Finally, in an area of shallow marshy pans, we found the hoped-for Long-toed Stint, which made for a great finish to a very satisfying day.

## Day 13

## Thursday 12th March

We left The Fisherman's Rest directly after breakfast, and after an hour or so's drive we stopped on a quiet canal-lined road, in an area of gardens and farmland. As soon as we arrived, we found ourselves watching a number of White-browed Crakes walking around on the emergent vegetation in the canal, and these were rapidly followed by good sightings of Bronze-tailed Jacanas, a couple of Purple Herons and a superb male Yellow Bittern. There were Oriental and Black-browed Reed Warblers too, and in the surrounding trees and scrub we found Asian Koels, Pied Starlings, Yellow-vented Bulbuls, a couple of Pied Fantails, a Common Iora and a Green-billed Malkoha.

Driving on, we paused for lunch and then reached Phra Pothisat, a temple complex set amid dramatic forested hills by mid-afternoon. Our target here was the localized Rufous Limestone Babbler, a Thai endemic. After a short search, we found a pair of them hopping around on the rocks, but it was a brief sighting, and we agreed to try

again at a different site on our way back to Bangkok in a few days' time. Also here were a few strikingly marked Variable Squirrels, and an engaging troop of Long-tailed Macaques.

A further short drive took us to our accommodation near Khao Yai National Park, and after a short break to settle in, we went out locally and enjoyed fabulous views of a roosting Spot-bellied Eagle-Owl (a mighty bird!) and a number of very handsome Red-breasted Parakeets. Finally, on our way back to the hotel, we came across a huge male Asian Elephant happily grazing in a patch of roadside scrubland. Understandably attracting a lot of attention from passers-by, he was a superb animal and made a brilliant finish to the day!

## Day 14

## Friday 13th March

Up early again, we were in Khao Yai National Park shortly after dawn. Highlights as we made our way up to the highest point in the park included a Moustached Barbet, a Grey-backed Shrike and a couple of excellent sightings of Silver Pheasants. By mid-morning, we were in a stretch of lower-level forest, where we found a pair of Banded Broadbills, a Bar-winged Flycatcher-shrike, some Blue-winged Leafbirds and both Red-headed and Orange-breasted Trogons! We finished the morning at one of the park campgrounds in a pleasant patch of open woodland, where we had nice views of Brown and Taiga Flycatchers, Black-crested and Grey-eyed Bulbuls, Plain and Cambodian Flowerpeckers and a Blue-eared Barbet.

Lunch was taken at the National Park visitor centre, where we enjoyed great views of a pair of Long-tailed Broadbills in the car park trees and a Pin-tailed Snipe at the edge of a well-vegetated stream; we then continued to the Nam Tok Hao Narok waterfall trail. A good walk here produced Van Hasselt's and Crimson Sunbirds, a pair of Asian Fairy Bluebirds, Great Iora, some Swinhoe's Minivets, a couple of Hill Mynas and a Laced Woodpecker. We made another stop in an area of nearby forest and found a Great Hornbill, another pair of Long-tailed Broadbills, and the hoped-for Banded Kingfisher, a striking-looking creature and a prize indeed! We finished up in some open grassland overlooking a lake, which was a pleasant spot to pause at the end of the afternoon. A gang of eight Great Hornbills worked their way through the trees on the far side of the water, while a Paddyfield Pipit potted around among a trio of dozing Sambars.

## Day 15

## Saturday 14th March

First thing today, we took a longish drive to the far side of the National Park, to a lovely stretch of old growth forest, where we found a group of four (possibly five) Dusky Broadbills building their huge and untidy hanging nest in a tall tree just in from the roadside. We could hardly believe it, as these normally shy and elusive birds gave us the very best of views: what extraordinary looking things they are! After this excitement, we moved on to another stretch of forest, and found Van Hasselt's Sunbirds, Scarlet-backed Flowerpeckers, Radde's Warbler, a surprise Black Baza and various other bits and pieces. A coffee break at a waterfall campsite with Great Hornbills and Blue Whistling Thrushes followed, and then we pushed on to yesterday's parkland campground. Here, we found a female Bar-winged Flycatcher-shrike at its nest, a pair of handsome Verditer Flycatchers and a Moustached Barbet.

We ate lunch at the visitor centre again, and then walked part of a nearby forest trail and found a family of Lar Gibbons, a Black-and-buff Woodpecker, some Ashy Minivets, a male Black-capped Monarch and, best of all, a

pair of stunning Red-headed Trogons. The male trogon posed particularly well, low down and close to the trail, allowing everyone some great views of him: what a fantastic looking bird!

We returned to the hotel for a short break, and then in the late afternoon headed off some distance to the Na Yang area where, in an area of forested limestone hills, we positioned ourselves at one of several bat viewing sites. From where we sat on the benches provided, we had a good view of a cave up on the hillside, where we understood the bats, mostly Wrinkle-lipped Freetails, would emerge. As the light began to fade, some strings of bats appeared from over the far side of the hill but not in the focused numbers, that we had hoped for. A shadow of disappointment was beginning to creep into some of our group when, at some unseen signal, untold masses of bats began pouring out of the cave above us and threading their way along the hillside. It was a truly amazing spectacle, and went on for over ten minutes! Hundreds of thousands of bats were just streaming out! Such numbers of any species will attract predators, and sure enough our bats were harried by a team of Shikras and Grey-faced Buzzards: it was dramatic and exciting for us to watch, a matter of life and death for the bats. Looking out over the surrounding landscape, we could see other skeins of bats that had emerged from other caves along the escarpment. The sheer biomass of these creatures was impressive, and a heartening testament to the health of the environment here.

## Day 16

## Sunday 15th March

We departed from the Khao Yai area after breakfast, bound for Bangkok. En route, we stopped at another temple complex in the limestone hills, and enjoyed much better views of Rufous Limestone Babblers than we'd experienced previously, plus a nice selection of other birds including Black-winged Cuckooshrike, Banded Bay Cuckoo, Coppermith Barbet, Ashy Minivet and Pied Fantail. After a restaurant lunch somewhere in the greater Bangkok area, we had a stroll in a large wooded park with lakes and pools, and finished our Thai birding with a Spotted Owlet, some Small Minivets, several Black-naped Orioles, a couple of Indochinese Rollers, and a range of other now familiar species.

A little later, we arrived at our airport hotel and said goodbye and thanks to Don, Jaeb and our drivers. They had all done a brilliant job and it had been an excellent tour from start to finish: how lucky we had been to have seen Thailand in this way!

## Day 17

## Monday 16th March

After a late and leisurely breakfast (a novel experience to us at this stage!) we transferred to the airport for our lunchtime flight. Everything went fairly smoothly, and we all arrived safely back at Heathrow on schedule some hours later.
