Tour participants: Jude Ainomugisha & Gerald Tumwekwase (Leaders) with eight Naturetrek clients.

Day 1

Wednesday 14th February

We left Heathrow on our late afternoon Kenya Airways flight to Nairobi, arriving early the following morning in time to catch our onward connection to Entebbe.

Day 2

Thursday 15th February

We arrived at Entebbe Airport where we were met by our tour leaders, and we then travelled to the 2 Friends Guest House in Entebbe.

After checking in, we proceeded to the Botanical Gardens where we saw a number of bird species. Some of the birds that we saw in Botanical Gardens included Great Blue Turaco, Broad-billed Roller, Woodland Kingfisher, Northern Black Flycatcher, Grey Parrot, Black-headed Weaver, Eastern Grey Plantain Eater, Crowned Hornbill, African Paradise Flycatcher, Grey Kestrel, White-throated Bee-eater, Common Bulbul, Red-billed Firefinch, Pink-backed Pelican, Hamerkop, Hadedda Ibis, Marabou Stork, Sacred Ibis, Long crested Eagle, African Jacana, Tambourine Dove, Speckled Pigeon, Red-eyed Dove, Showy-crowned Robin-chat, Black-headed Gonolek, Pied Crow, Collared Sunbird, Bronze Mannikin, Red-cheeked Cordon-bleu, Water Thick-knee, Gabar Goshawk and Lizard Buzzard. A fantastic start to our holiday!

Later in the evening, we headed back to 2 Friends Guest House for the night.

Day 3

Friday 16th February

After an early breakfast, we headed out going to the Mabamba swamp, crossing Lake Victoria by ferry. While on the ferry, we saw a number of species of birds including Open-billed Stork, Little Egret, Pied Kingfisher, Vieillot's Black Weavers, Villages Weavers, Sooty Chat and Long-tailed Cormorant, among others. Having crossed the lake we drove for about 45 minutes to Mabamba swamp.

Before boarding the canoes to explore the wetlands we found a few species in the grassland, such as Yellow-throated Longclaw, Black and White Casqued Hornbill, Crowned Hornbill, Lesser-striped Swallows, Broad-billed Rollers, Black-headed Gonolek and many more.

Finally the boats were ready and we got aboard - everyone was ready to try to find the mighty Shoebill! We started our search which lasted for about an hour and as we were searching, we encountered a number of species. Most of them were water birds like Yellow-billed duck, Long-tailed lapwing, African Jacana, African Marsh Harrier, Lesser Jacana, Blue-breasted Bee-eaters, Pink-backed Pelican, Purple Heron and Winding Cisticola. Finally Jude sighted a Shoebill in the distance. Everyone was excited to see it and we planned on how to get closer so that we could get a better view of it. We struggled with the canoes to get more closer so the group could have a better view since the Shoebill was probably the most sought after bird of the entire trip. We watched it for about 30 minutes or more while everyone was busy taking photos and recording videos of the Shoebill.

It was getting hot by now so we decided to leave the Shoebill in peace and we headed back to where we had left the vehicles. From there, we started the next part of our journey, heading to Lake Mburo National Park, with a break at the Equator where we had lunch.

As we were driving, we kept on picking up a few species for the list along the way like Long-crested Eagle, Fork-tailed Drongo, Lilac-breasted Roller, Abdim's Stork, Great Blue Turaco, Rossi's Turaco, and Striped Kingfisher. Finally we turned off from the main road heading to Lake Mburo. We continued birding and we saw Red-necked Francolin, Arrow-marked Babbler, Wattled Plover, Senegal Lapwing, Spot-flanked Barbet, Trilling Cisticola, Crested Francolin, Double-toothed Barbet, Tropical Boubou, Blue-naped Mousebird, Speckled Mousebird, Grey-backed Camaroptera and many more

Eventually we arrived at the Rwakoba Lodge where we had our evening meal and retired quite early after a long and exciting day.

Day 4

Saturday 17th February

We started today with an early breakfast and we began birding right away from the lodge and within the grounds. We saw African Green Pigeons, Red-billed Firefinch, Plain Pipit and Golden-breasted Bunting. As we were driving to Lake Mburo National Park, we saw the rare Red-faced Barbet and in the same area, we saw Yellow-crested barbet, which was very pleasing as it was among the birds on the "wish list" of some of the group. We had a full day in the park, seeing lots of species of birds, including White-throated, Little and European Beeeaters, Trilling Cisticola, African Grey Hornbill, Cardinal Woodpecker, Lappet-faced Vulture, Bateleur Eagle, Whalberg's Eagle, Spot-flanked Barbet, Scarlet-chested, Variable and Red-chested Sunbird, Baglafaecht Weaver, Senegal Lapwing, Wattled Lapwing, Western Banded Snake Eagle, African Fish Eagle, Black-bellied Bustard, Red-necked Spurfowl, Sulphur-breasted Bush Shrike etc

Day 5

Sunday 18th February

This was a special morning because we were going to search for other important species like the African Finfoot. Lake Mburo National Park is the best area to search for African Finfoot, so we drove to the lake and then boarded the boat. It took us some time to find a Finfoot but luck was on our side, and we finally saw it after a long search. Everyone had good views of this special bird, taking photos and videos. Other birds seen while we searched for and watched the Finfoot included Giant Kingfisher, Water Thick-knee, Rufous-bellied Heron, Black Crake, Swamp Flycatcher, Malachite Kingfisher, many Hamerkop, and Black-headed Heron. As we were searching for birds, we also saw some mammals, notably Zebra, Impala, Waterbuck, Bushbuck, Eland, Giraffe, Dwarf and Banded Mongoose, Warthogs and Vervet Monkeys.

Later in the day, rather reluctantly, we had to leave Lake Mburo, heading to our next lodge at Igongo Cultural Centre, where we stayed for just one night.

Day 6

Monday 19th February

After breakfast we boarded the vehicles and started our journey to Queen Elizabeth National Park, birding as we went. Along the way we saw Village Weavers, Sacred Ibis and Arrow-marked Babbler. A short distance from

Igongo, we sighted Southern Ground Hornbill, which was well outside its usual range. It is normally found in the eastern part of the country towards the Kenyan border and near Tanzania and this was the first ever record in this area. We continued birding along the main highway and we saw number of species like Fan-tailed Widowbird, African Firefinch, European Bee-eaters, Common Bulbul, African Harrier Hawk, Cinnamon-chested Bee-eater, Ring-necked and Red-eyed Doves, among others.

We stopped along the way to check a spot where Jude has always found Papyrus Gonolek on previous occasions, and we were successful, the group being able to photograph this shy and retiring species. We had lunch at Mweya Safari Lodge, which was to be our accommodation for the next two night, and is located on the peninsular which separates the Kazinga Channel from Lake Edward, giving it spectacular views over both. This afternoon, we explored Mweya grounds before going for an early evening game drive in search of birds, which was very successful, the species seen including Black-headed Gonolek, Pin-tailed Whydah, Rufous-naped Lark, White-browed Robin Chat, Blue-naped Mousebird, Grey-backed Camaroptera, Common Fiscal, Fork-tailed Drongo, Sooty chat, Broad-billed Roller, Augur Buzzard, Copper Sunbird, Square-tailed Nightjar, Brown Snake Eagle and African Harrier-hawk.

After a long day in the field we enjoyed our evening meal and a good night's sleep back at the Mweya Safari Lodge.

Day 7

Tuesday 20th February

After early breakfast, we headed out for a morning drive seeing various species of mammals, including Elephants, Buffalos, Ugandan Kob, Waterbucks, Bushbucks, Hippos, Vervet Monkeys, Banded mongoose and Olive Baboons. We also saw plenty of birds, notable species being Black-chested Snake Eagle, Croaking Cisticola, Yellow-billed Kite, African White-backed Vulture, Wahlberg's Eagle, Southern Red Bishop, Red-capped Lark and Martial Eagle. We returned to the lodge for lunch, then had an afternoon boat cruise on the Kazinga Channel, which is home to many water birds. We found Pink-backed Pelican, African Skimmers, Water Thick-knees, Malachite Kingfisher, Gull-billed Terns and Pied Kingfishers, while Red-throated Bee-eaters hawked for insects over the water and Palm-nut Vultures soared overhead. Mammals seen from the boat included more Elephants and Waterbuck, plus a Warthog.

Back at the lodge we enjoyed another evening meal and retired quite early, ready for the next part of our adventure tomorrow.

Day 8

Wednesday 21st February

After breakfast, we started our journey to Kibale National Park, birding along the way. On our way to Kibale National Park, we saw several species which were new for the holiday including; African Moustached Warbler, Goliath Heron, Angola Swallow, Grey-backed Fiscal, Abdim's Stork, Black-shouldered Kite, White-browed Coucal, Eastern Grey Plantain-eater, and Cinnamon-chested Bee-eater and eventually we entered Kibale forest. In the forest, as we were heading to Primate Lodge, we had several stops and we saw a number of species including; Purple-headed starling, Black and White Casqued Hornbill, Black-necked Weaver, Cassin's Grey Flycatcher, Slender-billed Greenbul, Joyful Greenbul and Black Bee-eater.

We had lunch at the Primate Lodge where we were also going to spend the next two nights. After lunch, we had a walk on the main trail and we saw some interesting forest species that include Western Nicator, Grey-throated Barbet, Luhder's Bushshrike, Brown-throated Wattle-eye, Black-throated Apalis, Bocages Bushshrike, Speckled, Yellow-throated and Yellow-rumped Tinkerbirds, Grey-headed and White-breasted Negritas, Vanga Flycatcher and Red-chested Cuckoo among many others.

Day 9

Thursday 22nd February

After an early breakfast at 5:30am, we started our search for the Green-breasted Pitta. This rare bird has a very localized distribution and it needs patience and perseverance to be able to see this it. We walked a distance of about one Km before reaching its territory. We were lucky that we heard him singing in the distance, and we started walking towards the area where he was displaying. He was keeping very still, and although we could hear him it proved difficult to see him, but as the light improved everyone was able to get a good view, although taking photographs was very difficult as he was well hidden in the undergrowth.

All the group were excited to have seen the Green-breasted Pitta here in Uganda, mainly because most weren't aware that it was found here, and it was a "lifer" for the entire group.

From there, we continued looking for more species like Tambourine Dove, Red-chested Owlet, Brown Illadopsis, Thick-billed Weavers, Double-toothed Barbet and Brown-crowned Tchagra, among others before returning to the Lodge for lunch.

After lunch, we headed out for another walk, this time in the neighbouring marshy area commonly known as Bigodi Swamp and we saw a few new species including Tawny-flanked Prinia, Blue-throated Roller, Blue-headed Coucal, Hairy-breasted Barbet and Black-crowned Tchagra, before we made our way back for our evening meal and our second night at Primate Lodge.

Day 10

Friday 23rd February

Extension to Murchison Falls

This morning we had to pack our bags and start our long drive to Murchison Falls National Park. Before setting off, we had to say good bye to John and Margret who were heading to Entebbe International Airport for their flights home to the UK.

On our way to Murchison Falls National Park, we stopped several times to look at birds which included Lizard Buzzard, Cinnamon-chested Bee-eater, Common Fiscal, Striped Kingfisher, Pied Kingfisher, Pied Crow, Piapiac, Winding Cisticola, and Black Kite, among others.

We reached our destination, Budongo Eco Lodge, where we had our evening meal and spent the first of our three nights here.

Day 11

Saturday 24th February

We had two full days to explore Budongo forest and the famous Royal Mile. After a long journey from Kibale National Park to Murchison the previous day we decided to bird Budongo forest where we encountered a number of species that are localized within the northern part of the forest and we were lucky to see some of them. We saw the rare Puvell's Illodopsis, Blue-breasted Kingfisher, White-thighed Hornbill, Honeyguide Greenbul, Red-tailed Bristlebill, African Pygmy Kingfisher, African Dwarf Kingfisher, Narina Trogon and African Palm Swift among many others.

Day 12

Sunday 25th February

It was an early start today with breakfast at 5:30am, and about 30 minutes later we began our journey to Royal Mile. Our first encounter was with a Spotted Eagle Owl which was feeding on White Ants on the main road. Everyone was excited by this unexpected sighting, although unfortunately it was still dark and we couldn't take photos. From Budongo Eco-Lodge, it's a journey of about 45km to the Royal Mile and by 7:15am it was light and we started birding in earnest, seeing Lizard Buzzard, Wahlberg's Eagle, Piapiac, Woodland Kingfisher, Grey-backed Fiscal and Ruppell's Long-tailed Starling among many others.

Near the famous Royal Mile, we first walked around the grassland and found several interesting species including Golden Weaver, Northern Red Bishop, Black-bellied Firefinch, Black-crowned Waxbill, Cabanis's Bunting, Compact Weaver, Yellow-backed Weaver, Grosbeak Weaver and Baglaffeht Weaver, among others. Finally we entered the Royal Mile itself. Looking for birds up in the canopy is always challenging, but we managed to find Uganda Woodland Warbler, Yellow Longbill, Lemon-bellied Crombec, Rufous Flycatcher Thrush, Yellow-crested Woodpecker, Buff-throated Apalis, Ituri Batis, African Blue Flycatcher, Speckled Tinkerbird and White-headed Saw-wing.

At around 3:30pm we finally nailed the most wanted bird for most of the group - Chocolate-backed Kingfisher perched high up in the canopy. Everyone was happy after a long search. We watched him for about 10 to 15 minutes before it started raining, so we headed back to the vehicle and returned to the lodge.

Day 13

Monday 26th February

This morning we loaded our bags into the vehicle and we drove towards the River Nile which we crossed by ferry to access the northern sector of Murchison Falls National Park. Before getting to the river we found a Black billed wood Dove which was a new species for us.

After crossing the Nile, we were in savannah grassland and we saw many typical mammals of this habitat, including African Elephant, Waterbuck, Ugandan Kob, Common Warthog, Bushbuck, Leopard, Lion and Giraffes among others. Among the birds seen on the savannah were White-backed Vultures, Wattled, Black-headed, Senegal and Spur-winged Lapwing, Dark Chanting Goshawk, Woodland Kingfisher, Little Bee-eater, Helmeted Guinea Fowls, Grey-crowned Crane, Swallow-tailed Bee-eater and Speckle-fronted Weaver.

Finally we checked in at Paraa Safari Lodge where we had lunch before going out again for a cruise on the mighty River Nile.

At 2:00pm, we were ready at the river bank waiting for the boat. While on the boat many interesting bird species were seen which included Giant Kingfisher, African Darter, Pied Kingfisher, Black Crake, African Jacana, Northern Carmine Bee-eater, Reed Cormorant, Grey-backed fiscal, Woolly Necked stork, Rock Pratincole and Northern Puff-back,

Afterwards we returned to the Paraa Safari Lodge where we had our last evening meal and our final night in Uganda.

Day 14

Tuesday 27th February

After an early breakfast we had a couple of hours birding in the Lodge grounds before crossing the Nile at about 9.00am heading back to Entebbe. We had several birding stops on the way, as well as a leisurely lunch stop, finally arriving at Entebbe in the early evening.

We had dinner at 2 Friends Guest House before heading to Entebbe International Airport to check in for our overnight flights home.

Day 15

Wednesday 28th February

Our flights from Entebbe to Heathrow, via Amsterdam, landed safely and after clearing immigration and collecting our luggage we said our goodbyes and went our separate ways home, after a fabulous holiday amongst the stunning scenery and wildlife of Uganda.
