Day 1

Friday 15th January

London Heathrow to Entebbe (via Amsterdam Schipol)

Weather: Grey & cold at Heathrow, dry and humid at Entebbe

Four of us departed an icy London Heathrow very early in the morning and met up with David and Helen at Schipol where we boarded our daytime flight to Entebbe. Arriving after dark, we met up with Emmy, our local guide and driver, changed some money and drove the short distance to our hotel, the Boma. We all got an early night.

Day 2

Saturday 16th January

Entebbe to Lake Mburo National Park (Mantana Camp)

Weather: Thunderstorms overnight, clearing, then dry and sunny

We awoke to some heavy showers but these soon cleared. Breakfast on the verandah was soon interrupted by our first bird, a Pied Crow. Packing and preparing to leave became a rather drawn out affair, as the garden was alive with birds including: Splendid Starling, Purple-banded Sunbird, African Hobby, White-browed Robin Chat and Red-eyed Dove.

Hitting the road we had our first glimpse of Lake Victoria, with a shoreline Hamerkop. Once out of the suburbs of Kampala, we had a series of roadside stops including photos at the Equator and views of choice birds, the first of which were a gaggle of stunning Great Blue Turacos (a strong contender for “bird of the trip”). Other birds seen en route included Long-crested Eagle, Speckled Pigeon, Black and White Casqued Hornbill, 2 Wahlberg’s Eagles at a nest and lovely Grey Crowned Cranes.

Entering Lake Mburo National Park, our first mammal of the trip was Impala, closely followed by Olive Baboon. We pressed on to a late lunch at our tented camp (which was interrupted by a fly-past of Lappet-faced Vultures). Lunch was followed by a game drive which gave us views of Burchell’s Zebra, Topi, Defassa Waterbuck, numerous Common Warthogs and an elusive Bohor Reedbuck. A host of birds were also spotted including the very smart Ross’s Turaco, Bare-faced Go-away Bird and the stunning Black-headed Gonolek (which soon became a trip favourite). A fine dinner was followed by an early night.

Day 3

Sunday 17th January

Lake Mburo National Park to Lake Bunyonyi (Nature's Island Camp)

Weather: Sunny intervals, warm

An early start and during the short drive to the shores of Lake Mburo we managed to spot Broad-billed Roller, Green Wood-hoopoe and a fine Double-toothed Barbet. There were also good views of Vervet Monkey (with young). On the lake shore there were Grey Wagtail and Dideric Cuckoo along with Black-headed and Lesser Masked Weavers and magnificent African Fish Eagles. Out on the lake, we were soon amongst large numbers of semi-submerged Hippopotamus and almost immediately spotted the rare and elusive African Finfoot. Other birds amongst the papyrus were Swamp Flycatcher, Slender-billed Weaver and the dainty & dazzling Malachite Kingfisher. Moving to more open areas of the shore, many more birds were to be seen, including numerous African Fish Eagles and Pied Kingfishers, Water Thick-knee, Common Sandpiper, Common Squacco Heron and a rather hidden, Giant Kingfisher.

All too soon it was time to leave the lake and head towards the park exit. We made a small detour to attempt to see Eland but instead got excellent views of Impala, Defassa Waterbuck, Warthog, Bushbuck and a lovely Saddle-billed Stork. Lunch was a buffet where we were able to sample several local dishes (the local peanut sauce proved particularly popular, the matoke - mashed plantain, less so!) and a stop at one of the many roadside fruit markets had us tasting 3 types of local banana. A narrow winding road brought us to Bunyonyi lakeside at sunset and enjoyed a short boat ride to our island based camp.

Day 4

Monday 18th January

Lake Bunyonyi to Buhoma – Gorilla Resort (Bwindi Impenetrable Forest) via Kabale

Weather: Sunny am and early pm, thunderstorms late pm

Another interrupted breakfast on a veranda - this time the culprits were Blue-headed Coucals and Black-lored Babblers. A post-breakfast walk around the island added a fine handful of new birds including Augur Buzzard, Cape Wagtail, Mackinnon's Fiscal, Red-chested Cuckoo and many splendid Red-chested Sunbirds.

Arriving back on the 'mainland' and into bustling lakeside market, we popped into Kabale to post some cards. Outside the Post Office we were charmingly sold a variety of fruit by some enterprising teenagers. Then it was off on the bumpy track to the Bwindi Impenetrable Forest with brief roadside stops to admire the scenery (fascinating steep cultivated terraces and distant views of the Virunga Volcanoes) and the birds (African Stonechat, Black Saw-wing, Pin-tailed Wydah).

Once in the forest we almost immediately stumbled upon a couple of L'Hoests Monkeys, a troupe of Guereza Colobus and a Carruthers' Mountain Squirrel along with a 'hoest' of forest birds which included Chubb's Cisticola, Black-headed Weaver, Cinnamon-breasted Bee-eater and two Black Bee-eaters (Emmys favourite) perched only a few metres away from us close to their nest hole.

Lunch was at a quaint hilltop restaurant and then it was on, skirting the forest, tea plantations and smallholdings full of cabbages and waving children, arriving at the Gorilla Resort in the late afternoon (accompanied by a heavy rain storm). Conversations at dinner were very much centred on the prospect of Gorillas and the day ahead!

Day 5

Tuesday 19th January

Bwindi Impenetrable Forest

Weather: Sunny, overnight thunderstorms

Today was the much-anticipated “Gorilla Day”. Strolling down the bumpy track lined with gorilla-themed curio shops we wondered what experiences lay ahead. At the park entrance we sorted the paperwork and listened to a briefing on what to expect and how to behave. We were split equally into two groups; John, David and Helen (along with 6 others) were allotted to the ‘R’ group, a 19 strong clan, which the previous day had been an easy 30 minute walk away. Sue, Gill and Rob were placed with ‘M’ group of 5 individuals, which required a 15 minute drive and then a predicted hour and a half’s steep trekking.

Some two hours later, on the edge of the forest and with many a precipitous and muddy slope behind us, we saw the first signs of ‘M’ group – a large green poo and then a black shape in a tree. Leaving all but our essentials with our porters we slowly approached and then followed the group as they moved to the forest edge and out into the open. It is hard to convey what the next hour or so with these 5 gentle creatures was like. They did what gorillas do: eat, play, belch and pass wind and we did what we do: watch fascinated and take countless photos and videos. The ‘keep 7m away’ and ‘avoid eye contact’ rules went out of the window as the gorillas approached us and one adult black back (Kanyonyi) decided he wanted to have a feel of Gill’s arm!

Meanwhile ‘R’ group had indeed been a relatively easy 30 minute walk away. They were mostly up in trees in dense forest and John had the dubious honour of being the target for gorilla waste! Back at the briefing point, still somewhat ‘light-headed’ from our excursion, we all received a certificate and were encouraged to spread the word about this amazing experience. We also enjoyed some good views of Black and White Shrike on its nest. Dave headed straight off on a long guided walk through the forest while the rest of us took our time to return to Earth and then, in late afternoon, went on a short bird walk around a self-guided trail and were rewarded with views of Yellow-rumped Tinkerbird, White-tailed Antbird and White-headed Bee-eater, as well as a rather lovely Red-tailed Monkey.

Conversation at dinner was, predictably, largely Gorilla based with everyone agreeing the experience had exceeded all expectations. Our discussions were cut short however by the approach of a thunderstorm and we all dived back to our tents just in time to avoid a complete soaking.

Day 6

Wednesday 20th January

Bwindi Impenetrable Forest

Weather: Sunny am, partly cloudy but dry pm

This morning we split three ways: Dave and Sue were off on a second Gorilla trek to view the 'R' group; Rob, Gill, John and Emmy were off on the long "waterfall walk" through the forest; while Helen was guided around the self-guided trail by Fred (a local guide).

'R' group were in much the same location and up to much the same fascinating activities. The large silverback came down from the trees and gathered his extended family around him, which meant one of the sub adult members had to wander through the onlookers.

The forest on the way to the scenic waterfalls was incredibly beautiful with the sun streaming through the greenery and alive with sound, although the source of the sound was usually deep in the shade and obscured by foliage. We did manage to see a Lüehder's Bush-Shrike, stand right under a stunning Bar-tailed Trogon and avoid standing on the impressive trail of safari ants. The return walk had us surrounded by L'Hoest's Monkeys who seemed quite happy for us to get remarkably close.

Helen also had a close encounter with these monkeys, saw a variety of birds and still had some time to catch up on a good book!

In the afternoon we all re-grouped for a community based 'Village Walk.' We started by finding out how the local banana juice, beer (or wine) and gin are made and had a taste of each (the gin appeared to go down best!). Then we spoke with the local healer (sporting a jaunty goat skin hat and bib) who seemed to have a wilted plant available to treat most ailments but wasn't averse to sending patients he couldn't treat to the local hospital (where he also works). After dancing with the Batwa (Pygmies), we visited the hospital and had an insight into how healthcare works in this part of the world. It was encouraging to see how the local community were benefiting from the cash generated by the neighbouring gorillas.

Day 7

Thursday 21st January

Bwindi Impenetrable Forest to Queen Elizabeth National Park (Mweya Lodge)

Leaving the Impenetrable Forest, we headed north and drove through numerous villages where we saw local activities such as threshing millet, drying maize and brick making. A stop for fuel at Kahihi took a little longer than expected when the attendant broke the van's ignition key but typically for Africa there was a solution at hand – the broken section was extracted and another one cut within an hour!

We were soon in the Queen Elizabeth National Park observing our first Elephants and Uganda Kob - both very numerous. The southern end of the park (Ishasha) is also famous for its tree climbing Lions. They prefer fig trees and, given the paucity of fig trees in this area, it was not long before we found one lion some 3m up a rather bare tree doing what lions do very well....very little.

Lunch was a picnic by a river overlooking the Democratic Republic of Congo on the opposite bank and in the company of Giant Forest Hog (glimpsed), Hippos (including a memorable very young calf) and Guereza Colobus. Birds for the day were plentiful and highlights were Palm Nut Vulture, Black-shouldered Kite, Martial Eagle, Grey-Crowned Cranes (with young), Violet-backed Starling, Southern Red Bishop and a cracking Verreaux's Eagle Owl.

We approached the Mweya Safari Lodge (our accommodation for the next three nights) late in the afternoon. A head in the long grass to our left turned out to be a female Leopard with two well grown cubs. Emmy crept the van up and down the track to get quite reasonable views of these elusive cats for a good five minutes before they disappeared into the undergrowth. Arriving elated, we scribbled our sighting onto the sightings board, settled into our rooms and thoroughly enjoyed our buffet dinner and the luxury of the lodge.

Day 8

Friday 22nd January

Queen Elizabeth National Park

Weather: Sunny am, showers around lunch, dry but cloudy pm

Pre-dawn, it was a wake-up coffee and muffins and then into the Land Cruiser ready for gate opening at 06.30. As the sun rose and the day warmed we watched numerous vultures flying in to some of the distinctive Candelabra Euphorbias, mostly White-backed but the odd Hooded amongst them. Plenty of other birdlife greeted the dawn too, including the some would say rather 'brown' Grassland Pipit, Red-naped Lark and Zitting Cisticola and the not so 'brown' Yellow-throated Longclaw and White-throated Bee-eater.

A packed breakfast was taken at a scenic spot overlooking a soda lake circled by a Montague's Harrier. Then it was off and a distant view of a lion in a thicket. Other wildlife seen included a Common Quail and a Yellow-winged Bat along with many Buffalo, Elephants and Kob.

Lunch was on the lodge veranda with Yellow-backed and Slender-billed Weavers at the bird table and Swamp Flycatchers clearing our crumbs. After a siesta, it was a short drive down to the landing stage and an incredible two hour boat trip along the Kazinga Channel between Lake Edward and Lake George. Within minutes it was clear that this experience was to be the second major highlight of the holiday. The variety of life was hugely impressive; at one point we were encircled by Hippos in the water, with more Hippos, Buffalo and Nile Crocodiles on the shore, whilst above us wheeled hundreds of Gull-billed Terns and African Skimmers. Also scattered all along the shore were Yellow-billed Storks, African Spoonbills, Little Egrets, Black-winged Stilts and Common, Wood and Marsh Sandpipers. As we chugged slowly up the shoreline there were more birds to enjoy: Kittlitz's, Ringed and Three-banded Plover and Malachite and African Dwarf Kingfisher, along with countless Pied Kingfishers. There were also several Elephants taking a drink, a large Nile Monitor, a troupe of Vervet Monkeys and yet more Hippos and Buffalo. At the far end of the channel was another bird overload to marvel at. Here, a huge throng of Great Cormorants were joined by strolling Maribou and Yellow-billed Storks and a scattering of Pink-backed and Great White Pelican, Sacred Ibis and Grey-headed and Lesser Black-backed Gulls. Just before the end of this incredible ride we spotted a Goliath Heron, which flew off across the front of the boat.

Returning to the landing stage, Emmy suggested there was just time to seek out some nightjars near the lodge – so we did and were rewarded with views of African White-tailed (Swamp) and Gabon (Square-tailed) Nightjars. We were also joined by a family of around 20 very friendly and entertaining Banded Mongoose - another highlight of the trip for at least one member of the group! Pre-dinner drinks in the bar were in the company of the regular visitors - a Swamp Flycatcher and a chunky "miscellaneous" bat.

Day 9

Saturday 23rd January

Queen Elizabeth National Park

Weather: Sunny

A second pre-dawn coffee and muffins and out before dawn. The sunrise was stunning but the wildlife a touch sparse, although we saw plenty of Uganda Kob and Buffalo along with several Black-bellied Bustards, Red-chested Swallows, Holub's Golden Weaver, Black Headed Gonolek (always a pleasure) and had time to have a good long look at (and listen to) several Cisticolas including Zitting, Stout and Siffling! An unusual spot was a large African Rock Python.

Breakfast was again overlooking the soda lake. This was followed by a quick drive around a fishing village, one of a handful that is allowed to continue fishing, but not grow crops, within the park – clearly a hard life. The drive back to the lodge was punctuated by a herd of Elephant (including a tiny youngster) crossing the road, a Hippo (unusually out in the day and which took offence to our van and thought about charging) and a young Spitting Cobra that also briefly 'threatened' our van.

Lunch and a short siesta and/or swim were followed by a very scenic drive around the edges of several 'explosion craters', some lined with woodland, some with grassland, some swamp and some water-filled. As well as great views of a relatively tame Blue-Headed Agave, lots of new birds were seen, including African Crake, African Hoopoe, Black-crowned Tchagra, Black-headed Oriole, Northern Black Flycatcher, Grey Woodpecker and Red-shouldered Cuckoo Shrike.

In the evening we all celebrated Dave's birthday and enjoyed sharing his birthday cake!

Day 10

Sunday 24th January

Queen Elizabeth National Park to Kibale (Ndali Lodge)

Weather: Light rain am, sunny intervals pm

A leisurely and expansive buffet breakfast at the Lodge was followed by a final stroll around the grounds. The nightjars were again seen, along with Wire-tailed Swallow, Grey-backed Cameroptera and Yellow-fronted Canary. Then it was time to hit the road again (but not before the Banded Mongoose family had come to say goodbye). As the first part of the journey was through the National Park, there was still plenty to see including a shy Bushbuck that stood still long enough for us to admire its spots. The Pallid Harrier was probably the top bird spot, followed by the Lizard Buzzard, with the Winding Cisticola probably third....? Leaving the Park we stopped for photos as we crossed the equator for the second time. Other quick stops included one to sample the local peanuts and to photo a man with a bike unfeasibly laden with bananas.

We arrived at Ndali Lodge, with its scenic views (the Rwenzori Mountains to one side and Crater Lake Nyinambuga to the other) to be greeted by the owner, Aubrey in time for a late lunch.

After a delicious lunch and short rest to admire the many birds in the garden including Cinnamon-chested Bee-eater., we had an afternoon walk down to and around the hotel plantation which mainly grows vanilla but also avocado, cocoa, coffee, guava, eucalyptus and has some native forest. The complex process of vanilla production was explained to us and we saw a fair few birds including African White-eye, Dark Blue Flycatcher, Great Blue Turaco, Little Sparrowhawk and some lovely views of an African Paradise Flycatcher that we followed up the hill and an Eastern Grey Plantain-eater. On returning, well-earned sundowners were taken watching the sun set and thunder storms over the Rwenzoris. Supper was a candle-lit affair in the amazing lodge joined by a number of other travellers with interesting tales to tell.

Day 11

Monday 25th January

Kibale

Weather: Sunny am, partly cloudy pm

“Chimp Day”! After a fine early breakfast we had a slippery drive to Kibale National Park (ticking off Crested Guineafowl on the way). On arrival at the park HQ, we had a briefing and then the six of us and our local guide, Ronald, set off back up the track to search for the Chimps. Some half an hour into the walk (including having stopped admire Black Bee-eater, Yellow-billed Barbet, Red-tailed Monkey, Central African Red Colobus and Grey-cheeked Mangabey) we detoured into the forest and within minutes we were ensconced under a large fig tree sporting a large group of Chimps, of which we could see about a dozen. As with the Gorillas, we spent about an hour watching the chimps go about their business, which largely consisted of lying around, picking and eating the occasional choice fig (Roman dignitary like), scratching, and grooming each other. After some time it became clear the Chimps weren’t about to move so we took a short trek through the dense undergrowth to see if there were other members of the group in another fig tree nearby. Having confirmed that all the family were in that one tree, we returned in time to hear them starting to move off and were treated to some very loud vocalizations.

We wandered back to the park HQ, and tucked into our packed lunches in the small café. Then a short walk through the forest. As always, forest bird-watching proved challenging, especially given the time of day, but most got good views of Hairy-breasted Barbet, Green Hylia and Yellowbill. Afterwards we returned to Ndali Lodge, where we all relaxed and had a well earned rest/swim/read before another display of storms and sunset over the Rwenzori and another candlelit dinner.

Day 12

Tuesday 26th January

Kibale to Entebbe

Weather: Sunny, warm and humid

Today it was time for the long drive back to Entebbe, though with a few stops on the way. As the road cut through a small corner of the Kibale National Park, we stopped by a river and were rewarded with some cracking views of 5 monkey species - Central African Red Colobus, Guereza Colobus, Grey-cheeked Mangabey, Gentle (Blue) Monkey and Red-tailed Monkey.

Picnic lunch was under a shady acacia on the edge of a wetland but there were surprisingly few birds to see. We arrived at Entebbe with plenty of time to refresh ourselves at a hotel, add a few final excellent bird sightings (Double toothed-barbet and Eastern Grey Plantain-eater) and a mammal - Egyptian Fruit Bat to the list and have a final drink/meal together as a group.

Saying goodbye to Emmy at the airport was somewhat emotional as we had become such a close group ("his Naturetrek family") and had had such an amazing time together.

Our overnight flight left a touch late and at least some of us managed to get some sleep.

Day 13

Wednesday 27th January

London Heathrow (via Amsterdam Schipol)

Weather: Grey

Sadly, this was the end of our excellent trip. We bade each other farewell and made our ways home, each of us with very fond memories of the people, scenery and wildlife that make Uganda such an African gem.

Receive our e-newsletter

Join the Naturetrek e-mailing list and be the first to hear about new tours, additional departures and new dates, tour reports and special offers. Visit www.naturetrek.co.uk to sign up.
