Tour participants: Samuel Lenard Chihana (Local Guide) with four Naturetrek Clients

Please note that this tour report only covers the first part of the tour, in Malawi, that was led by Samuel Lenard Chihana. We do not have reports from the other Local Guides.

Day 1

Sunday 2nd October

In flight to Kamuzu International Airport.

Day 2

Monday 3rd October

Weather: overcast and cloudy. We met at Kamuzu International Airport and, having sorted immigration formalities, changed their money and loaded the vehicle, we started our drive to Mvuu around 2.35pm. Along a Forest Reserve at Linthipe I offered them a packed lunch and they had an opportunity to walk around and stretch their legs. During our lunch break we saw Southern Citril and Bronze Manikin, flying and perched. On our way from the airport and just before stopping we saw Pied Crows, Lilac-breasted Rollers and House Sparrows. We also saw White-necked Ravens as we passed Dedza.

We arrived at around 7.45pm. I gave them a briefing during check in, mentioning all activities offered in the Camp, including Village Tours, Rhino tracking, Sanctuary Drives and Hides, Help Malawi and School Visiting, and also the opportunity to visit or participate in Bat or Carnivore Research, if interested.

I offered them an early 5.15am morning combination of a boat safari and a walking safari for them to recover well from the long drive from airport. The aim was to see White-backed Night Herons as they arrive from their feeding grounds for best sightings, Pel's Fishing Owl roosting, Brown-breasted Barbet, Green Malkoha and Bohm's Bee-eaters nesting across the river.

Day 3

Tuesday 4th October

Today the weather was luckily cool and cloudy. We started the boat safari at 5.15am with a cup of coffee or tea in our hands with some biscuits. We managed to see White-backed Night Herons on the shore of the river, Green Malkoha, Brown-breasted Barbet, Palm-nut Vulture, flying and perched, African Darters, and a pair of Red-necked Falcons feeding their chicks on the nest. We had a very productive time and, as it was not a hot day, came back at 10am. On the walk we also had a very good sighting of a snake, a Black Mamba hunting some weavers and Palm Thrushes.

After breakfast all four guests chose to rest until lunchtime. Later, after tea and coffee, we set off at 3.30pm for a game drive with sundowner by the river side in the southern floodplain. We saw a breeding herd of elephants, Warthogs, Waterbucks, Hippos, Impalas, African Buffaloes, Western Banded Snake Eagle, Lillian's Lovebirds, Bat Hawk during sundowner, Crowned Lapwings and Senegal Lapwings. Also, we saw Red-billed Oxpeckers on the back of a Greater Kudu in middle of the herd of Elephants. Other birds were Dickenson's Kestrel on the nest just after starting at the camp and another one perched in a dead Leadwood tree in the southern floodplain; Palm-nut Vulture; African Skimmers flying after sunset, skimming the water surface; Lillian's Lovebirds, Bohm's Bee-eaters, and Collared Palm Thrushes. We got back at 7pm.

Day 4

Wednesday 5th October

Weather: hot with very little cloud cover. We drove out to do a walking safari at 5.30am until 9.30am with the aim of viewing African Skimmers, other wetland birds like Yellow-billed Storks, and hybrid Blacksmith x Spur-winged Lapwing which is breeding in that area. However, although we only found a female Spur-winged Lapwing looking after chicks, the hybrid did not appear. Also, we were looking for Sables and Zebras drinking in the floodplain.

On afternoon drive had the aim of finding more Raptors. We started 3.30 returning at 8.30pm, and a few times, we saw Walberg Eagles sitting in trees, one was hunting and managed to catch a bird. We also found Martial Eagle, on the 'wanted list' of the group, and African Hawk-Eagles and their nests by the Naifyulu road, east of the park with a mixed woodland. We found a Red-necked Spurfowl female hiding from a displaying male; we managed to find a Red-necked Spurfowls group with one male displaying to the female, and later, the female flew into a low shrub to join other females which were close to us, and relaxed.

A male Sable Antelope along the Masanje road had just entered sanctuary from a drink. We also recorded Common Duikers, African Scops Owls calling, Porcupine, Meller's Mongoose, a few Large-spotted Genets, a black-tailed 'Scrub Hare', Grey-headed Bushshrike, Bateleur, Western Banded Snake Eagle, Lizard Buzzard, African Barred Owllet in the morning, Racket-tailed Rollers, a parent and two sub adults, plus Yellow-billed Storks, Squacco Herons and Brown-headed Parrots.

After dinner, we also went out for star gazing; we saw the Pleiades rising while Scorpio was setting, and we also saw a famous two-year-old Meller's Mongoose without a tail. We started seeing it with its mother when it was small, now it is moving on its own. It's been nick-named Kiwi Meller's Mongoose.

Day 5

Thursday 6th October

Weather: another hot day. Our last activities at Mvuu Camp were two boat safaris. The first was from 5.30am until 8.30am, with an aim of having a second enjoyment of White-backed Night Herons and to try for Pel's Fishing Owl. The second one was from 9.30 until 11.30am, looking for Sable Antelopes and Zebras along the Shire River. We managed to find two Zebras among a breeding herd of Sable Antelopes, a very good sighting from the boat. We also enjoyed Southern Ground Hornbills on both last boat Safaris we did at Mvuu.

After lunch, at 2.30pm we drove to Zomba Ku-Chawe Inn for two nights, reaching there at 5pm. We managed to see Livingstone's Turaco flying across the road; Red-throated Twinspots feeding on the ground opposite Mulunguzi Dam, Southern Ground Hornbills, Meve's Starlings, Livingstone's Flycatchers, Bohm's Bee-eaters and Lesser Swamp Warbler.

Day 6

Friday 7th October

Weather: a hot day. At 6am we went birding at the Botanical Gardens and in Dr. John Wilson's gardens for White-winged Apalis, returning at 8.30am. We heard the White-winged Apalis calling as we were looking around in tall *Newtonia buchananiana* trees (which is the food plant for the caterpillars these Apalis feed on). We saw a Scaly-throated Honeyguide sub-adult being fed by a pair of Cardinal Woodpeckers until we left the site. The

White winged Apalis near Dr. John Wilson's house did not show up on its nest, but he said it was around the whole day before, when we were driving to Ku Chawe Inn.

From 10am until 5pm, we were birding at the Trout Farm, Williams Falls, Queen's and Emperor's Views and Chingwe's Hole.

At the Botanical Gardens we heard African Emerald Cuckoo, saw two Mountain Wagtails flying and later on walking on the bridge along the road, plus we saw White-browed Robin-Chats, a female Black Cuckooshrike, Red-billed Waxbills, Dark-backed Weavers, Bertrand's Weavers, White-eared Barbets, the Scaly-throated Honeyguide being fed by a pair of Cardinal Woodpeckers, Eastern Saw-wing swallows, Square-tailed Drongo and Little Greenbul.

After breakfast, around the bridge before the Trout Farm, we saw Mountain Wagtail, Black-headed Apalis, Yellow-throated Apalis, and the near-endemic to South Africa Olive Bushshrike gave good views a few times. A Livingstone's Turaco also gave good views for a long time while calling, sitting in the shade.

At Williams Falls we had good views of the White-starred Robins and Yellow-throated Woodland Warblers. White-tailed Crested Flycatcher (Elmina) also appeared during lunch while we were sitting on rocks, and we had another good sighting of Mountain Wagtail entering in little cave along the upper side of falls; it was possibly sitting on eggs, as was not seen coming out until we left. We also had a sighting of a Crowned Eagle in flight.

At Chagwa Dam we heard, followed, and saw, Yellow-throated Woodland Warblers, heard Eastern Evergreen Forest Warblers, and saw Eastern Saw-wing Swallow, Little Greenbul and Olive Sunbirds. We also went to viewpoints where we enjoyed a lot of flowers in the grassland, including False Copper Flowers, *Dissotis*, *Polygala*, *Hypericum* and many more. For two years after independence Malawi, then Nyasaland, was a Monarchy with Queen Elizabeth II. She was Sovereign until 6th July, 1966, when the role of Queen and Governor General was abolished in Malawi. Queen's View is named after her. Emperor's View is named after Emperor Haile Selassie, who visited soon after Malawi became independent. We also enjoyed the view of Zomba City.

At Chingwe's Hole we saw a Rock Kestrel flying around until we left, Red-winged Starlings on the cliffs, and African Black Swifts feeding down in the cliff. We also heard a Red-necked Spurfowl around there. On the way down back to Ku Chawe Inn we saw Bertrand's Weavers, Southern Citrils, Olive Sunbirds, African Firefinch, and Southern Mountain Greenbuls feeding on Himalayan Raspberries *Rubus ellipticus*.

Day 7

Saturday 8th October

Weather: hot. This morning we drove from Ku Chawe Inn to Kayak Africa Base, leaving at 7am. En route we did a short city tour in Zomba to the Memorial Pillar for the First and Second World Wars. When we reached Cape Maclear, I showed the guests the famous Rock 'Mwala Wa Mphini' a large rock marked with erosion scars, considered by some local people to be sacred. We arrived at the Kayak Africa Base at 10am.

The group then transferred to Mumbo Island for two nights before continuing on to Zambia, and I said good-bye to them.
